

Cover to cover translation of the present IZVESTIYA is published by Allerton Press, Inc. New York, under the title

# *JOURNAL OF CONTEMPORARY MATHEMATICAL ANALYSIS*

(Armenian Academy of Sciences)

Below is the contents of a sample issue of the translation

Vol. 51, No. 5, 2016

## CONTENTS

|                                                                                                                                                     |         |
|-----------------------------------------------------------------------------------------------------------------------------------------------------|---------|
| H. GHAHREMANI-GOL, A. RAZAVI, The Ricci Flow as a geodesic on the manifold of Riemannian metrics.....                                               | 215     |
| H. A. ATIA, Magnetic bi-harmonic differential operators on Riemannian manifolds and the separation problem.....                                     | 222     |
| F. A. TALALYAN, On the metric type of measurable functions and convergence in distribution.....                                                     | 227     |
| M. S. GINOVYAN AND A. A. SAHAKYAN, On the robustness to small trends of parameter estimation for continuous-time stationary models with memory..... | 232     |
| K. L. AVETISYAN, N. T. GAPOYAN, Bergman type operators on mixed norm spaces over the ball in $\mathbb{C}^n$ .....                                   | 242     |
| H. M. HAYRAPETYAN, V. G. PETROSYAN, Riemann problem in the weighted spaces $L^1(\rho)$ .....                                                        | 249     |
| M. H. HOOSHIKAND, Analytic summability of real and complex functions.....                                                                           | 262-268 |

## ИЗВЕСТИЯ ИАН АРМЕНИИ: МАТЕМАТИКА

том 51, номер 6, 2016

## СОДЕРЖАНИЕ

|                                                                                                                                                 |       |
|-------------------------------------------------------------------------------------------------------------------------------------------------|-------|
| S. A. BONDAREV, V. G. KROTOV, Exquisite properties of functions from Hajlash–Sobolev classes $M_\alpha^p$ , $p > 0$ , I. Lebesgue points .....  | 3     |
| Г. А. КАРАПЕТЯН, Интегральное представление и теоремы вложения для мультянизотропных пространств в плоскости с одной вершиной анизотропии ..... | 23    |
| К. А. КЕРЯН, О безусловной базисности в $H^1(R)$ системы функций Франклина с нулевыми средними .....                                            | 43    |
| А. ВАРДАНИЯН, Наилучшие равномерные приближения на вещественной оси гармоническими в $\mathbb{R}^2$ функциями .....                             | 72    |
| Содержание тома 51, номера 1 – 6, 2016 .....                                                                                                    | 79–80 |

## IZVESTIYA NAN ARMENII: MATEMATIKA

Vol. 51, No. 6, 2016

## CONTENTS

|                                                                                                                                                         |       |
|---------------------------------------------------------------------------------------------------------------------------------------------------------|-------|
| S. A. BONDAREV, V. G. KROTOV, Exquisite properties of functions from Hajlash–Sobolev classes $M_\alpha^p$ , $p > 0$ , I. Lebesgue points .....          | 3     |
| Г. А. КАРАПЕТЯН, Integral representations of functions and embedding theorems for multianisotropic spaces on the plane with one anisotropy vertex ..... | 23    |
| К. А. КЕРЯН, On unconditional basis property in the space $H^1(R)$ of a system of Franklin functions with vanishing means .....                         | 43    |
| А. ВАРДАНИЯН, The best uniform approximation of functions on the real axis by harmonic in $\mathbb{R}^2$ functions .....                                | 72    |
| Author Index to Volume 51, numbers 1 – 6, 2016 .....                                                                                                    | 79–80 |
