

INDEX OF AUTHORS

<i>Abramov Y. Y., Napartovitch A. P.</i> The resonance line radiation transfer from point source in semi-infinite medium	187
<i>Agektan T. A., Anosova J. P., Bezgubova V. P.</i> Formation of binary systems in triple encounters	637
<i>Agektan T. A., Baranov A. S.</i> The construction of stellar system models by numerical experiment	305
<i>Agektan T. A., Michelle I. M.</i> The rotating systems of gravitating bodies in quasi-stationary state	623
<i>Anosova J. P.</i> The investigation of the dynamics of triple system by the method of statistic tests. III. Case of components of different masses	161
<i>Anosova J. P.</i> (see <i>Agektan T. A.</i>)	637
<i>Antonova T. D., Vitkevitch V. V., Panajtan V. G.</i> Estimation of intensities of fluctuating component of radio source 3C 273 at frequencies 86 and 60 <i>Mhz</i>	283
<i>Arakeltian M. A.</i> The curve of growth for an expanding atmosphere	75
<i>Arakeltian M. A.</i> On the nature of evolutionary effects associated with quasi-stellar radio sources. I.	461
<i>Arakeltian M. A.</i> On the nature of evolutionary effects associated with quasi-stellar radio sources. II.	603
<i>Baranov A. S.</i> (see <i>Agektan T. A.</i>)	305
<i>Bezgubova V. P.</i> (see <i>Agektan T. A.</i>)	637
<i>Bisnovaty-Kogan G. S.</i> , (see <i>Seldov Z. F.</i>)	243
<i>Bisnovaty-Kogan G. S.</i> (see <i>Zeldovitch Y. B.</i>)	223
<i>Bisnovaty-Kogan G. S.</i> (see <i>Zeldovitch Y. B.</i>)	425
<i>Chavushtan O. S.</i> (see <i>Parsamian E. S.</i>)	499
<i>Chernin A. D.</i> Interaction of vortex and potential motions in relativistic hydrodynamics. II.	656
<i>Chernin A. D., Eldelman E. D.</i> Interaction of vortex and potential motions in relativistic hydrodynamics. I.	654

<i>Chubarian E. V. (see Papoyan V. V.)</i>	97
<i>Chubarian E. V. (see Papoyan V. V.)</i>	415
<i>Dagkesamanski R. D. On the dependence of the spectral index of extragalactic radio sources from flux density</i>	297
<i>Dibay E. A. The spectra of stars in comet-like nebulae</i>	249
<i>Domke H. Line formation in magnetic field. I. Scattering matrix</i>	525
<i>Doroshkevich A. G., Zeldovich Y. B., Novikov I. D. The kinetic theory of neutrons in the anisotropic cosmological models</i>	539
<i>Eidelman E. D. (see Chernin A. D.)</i>	654
<i>Elnasto J. E. The Andromeda galaxy M 31. I. Preliminary model</i>	137
<i>Goudkova G. A. (see Shoulou O. S.)</i>	477
<i>Grinin V. P. On the relative intensities of the hydrogen lines in the spectra of nebulae</i>	213
<i>Grinin V. P. Intensities of the hydrogen lines emitted by an optically thick plasma</i>	371
<i>Gurzadian G. A. On the light-curves of flare stars</i>	383
<i>Guseinzade A. A. The photoelectric photometry of the Wolf-Rayet type binary star HD 211853</i>	502
<i>Kaliberda V. S. The velocity distribution function for stars of small mass in star-clusters</i>	433
<i>Kaplan S. A., Tsitovich V. N. The scattering of radiation in the spectral line of the turbulent plasma</i>	21
<i>Khachikian E. Y. (see Weedman D. W.)</i>	113
<i>Kipper T. A. Spectrophotometry of the F-stars. IV. Line profiles in the spectra α Boo, ν Her and 41 Cyg</i>	123
<i>Kolesov A. K., Sobolev V. V. On some asymptotic formulae in the theory of anisotropic light scattering</i>	175
<i>Latyshev I. N. The masses of cepheids</i>	331
<i>Leonov V. V. The radiation of Novae before the light maximum</i>	55
<i>Manjós A. V. The cosmological solutions of the Jordan-Dicke field equations and the observed data</i>	663
<i>Markarian B. E. The galaxies with ultraviolet continuum. II.</i>	443
<i>Markarian B. E. The galaxies with ultraviolet continuum. III.</i>	595
<i>Marochnic L. S. On the relaxation of stars of flat subsystems of galaxy on spiral structure</i>	487

<i>Michelle I. N.</i> (see <i>Agekian T. A.</i>)	623
<i>Mnatsakanian M. A.</i> On Salmona's paper on the model of static configuration .	169
<i>Mnatsakanian M. A.</i> Polytropic models by the relativistic generalised theory of gravity	645
<i>Mnatsakanian M. A.</i> (see <i>Sahakian G. S.</i>)	555
<i>Nagtrner D. I.</i> Nonstationary radiation field in infinite media	31
<i>Nagtrner D. I.</i> Transfer of resonance radiation in the optically thick layer .	507
<i>Napartovitch A. P.</i> (see <i>Abramov Y. Y.</i>)	187
<i>Novikov I. D.</i> (see <i>Doroshkevitch A. A.</i>)	539
<i>Panajian V. G.</i> An estimation of angular dimensions of radio source 3C 48 at 60 Mhz from interplanetary scintillations	291
<i>Panajian V. G.</i> (see <i>Antonova T. D.</i>)	283
<i>Papoyan V. V., Sedrakian D. M., Chubartan E. V.</i> Slowly rotating relativistic polytropic models	97
<i>Papoyan V. V., Sedrakian D. M., Chubartan E. V.</i> Slow rotation of white dwarf and barionic stars	415
<i>Parsamian E. S., Chavushian O. S.</i> Two remarkable flare stars in Pleiades . .	499
<i>Petruchin N. S.</i> The investigations of the influence of radiation on the convection in polytropic atmosphere	615
<i>Porfiriev V. V., Redcoborody Yu. N.</i> The effect of electron screening on thermonuclear reactions under high densities	393
<i>Redcoborody Yu. N.</i> (see <i>Porfiriev V. V.</i>)	393
<i>Rodriguez M. H.</i> The total line and band absorption in spectra of F—M stars	269
<i>Sahakian K. A.</i> On the central condensations in Sa galaxies	593
<i>Sahakian G. S., Mnatsakanian M. A.</i> On the relativistic generalized theory of gravity. II. Baryon configurations	555
<i>Sedrakian D. M.</i> (see <i>Papoyan V. V.</i>)	97
<i>Sedrakian D. M.</i> (see <i>Papoyan V. V.</i>)	415
<i>Seidov Z. F.</i> The ellipticity of slowly rotating configurations	503
<i>Seidov Z. F.</i> (see <i>Bisnovaty-Kogan G. S.</i>)	243
<i>Sizikov V. S.</i> A model of the distribution of mass in M 31. II.	317
<i>Sobolev V. V.</i> Diffuse reflection and transmission of light by an atmosphere with anisotropic scattering	6
<i>Sobolev V. V.</i> Anisotropic light scattering in the atmosphere of finite optical thickness	343

<i>Sobolev V. V.</i> (see <i>Kolesov A. K.</i>)	175
<i>Shoulov O. S., Goudkova G. A.</i> On the intrinsic polarization of the RY Persei radiation	477
<i>Taranov V. I.</i> About the possible nature of short-period variations of light of the star DQ Her	337
<i>Terebizh V. Yu.</i> The polychromatic light scattering in a semi-infinite medium .	359
<i>Tsitovich V. N.</i> (see <i>Kaplan S. A.</i>)	21
<i>Vandakurov Y. V., Zeldovitch Y. B.</i> The interaction between low frequency and high frequency stellar pulsations	235
<i>Vardantan R.S., Yengibartan N. B.</i> On the nonlinear nonstationary problem of radiation transfer in spectral line	203
<i>Vitkevitch V. V.</i> (see <i>Antonova T. D.</i>)	283
<i>Vityasev V. V.</i> On the expansion of planetary nebulae	83
<i>Weedman D. W., Khachikyan E. Ye.</i> Spectral observations of Markarian galaxies with ultraviolet continuum	113
<i>Yengibartan N. B.</i> (see <i>Vardantan R. S.</i>)	203
<i>Zeldovitch Y. B.</i> (see <i>Bisnovaty-Kogan G. S.</i>)	223
<i>Zeldovitch Y. B.</i> (see <i>Bisnovaty-Kogan G. S.</i>)	425
<i>Zeldovitch Y. B.</i> (see <i>Vandakurov Y. V.</i>)	235
