

CONTENTS

Number 1

Photometric and polarimetric study of IR-stars in the optical and infrared parts of the spectrum	<i>V. A. Dombrovsky, G. V. Khozov</i>	5
The spectrophotometric investigation of cometary nebula NGC 2261	<i>M. A. Kazartan, E. Ye. Khachikyan</i>	17
The spectra of Markarian galaxies. IV	<i>M. A. Arakelian, E. A. Dibag, V. F. Yestpov</i>	33
Morphology of galaxies in the clusters. I. The cluster A 262	<i>A. T. Kalloglian</i>	43
On the theory of the radiation heat-exchange in the polytropic atmospheres	<i>V. P. Grtnin</i>	53
Noncoherent scattering. II. Anisotropic scattering	<i>N. B. Yengibartan, A. G. Nicoghossian</i>	71
Influence of shock waves upon profiles of $H\gamma$ spectral lines and light curves for stars of RR Lirae and W Virginis types	<i>V. I. Golinko</i>	91
The mass accretion by a neutron star in double system. II	<i>P. R. Amnuel, O. H. Gushtnov</i>	107
The threshold of disintegration of nuclei in degenerate electron neutron gas	<i>Yu. L. Vartanian</i>	117
On nuclear reactions in the degenerated electron-nuclear plasma	<i>G. S. Sahaktan, R. M. Avaktan</i>	123
The phase-mixing of the second kind in stellar systems. I . . .	<i>L. P. Ostpkov</i>	139
NOTES		
The scattering of light in a sphere with arbitrary source distribution	<i>N. B. Yengibartan</i>	149

Number 2

Galaxies with ultraviolet continuum. V. .	<i>B. Ye. Markarian, V. A. Lipovetsky</i>	155
---	---	-----

On the nature of galaxies with ultraviolet continuum. I. Principal spectral and colour characteristics	<i>B. Ye. Markarian</i>	165
The spectra of Markarian galaxies. V <i>M. A. Arakelian, E. A. Dibay, V. F. Yesipov</i>		177
Hydrogen lines in the spectrum of Markarian 6 galaxy during its activity <i>V. I. Pronik, K. K. Chuvpaev</i>		187
Light scattering in a homogeneous sphere	<i>V. V. Sobolev</i>	197
Noncoherent scattering. III	<i>N. B. Yengibartan, A. G. Nicoghossian</i>	213
On the possibility of acceleration of matter in hot stars by absorption in spectral lines	<i>I. F. Malov</i>	227
On diffusion of radiation in stellar shell expanding with constant velocity <i>V. V. Vityasev</i>		235
On the nature of the UV Ceti-type stars flare radiation <i>A. A. Korovyakovskaya</i>		247
The evolution of white dwarf with accretion of hydrogen rich matter. I. <i>Yu. N. Redkoborody</i>		261
The atmosphere of non-rotating baryon stars <i>G. S. Sahakian, D. M. Sedrakian</i>		283
The phase mixing of the second kind in stellar systems. II.	<i>L. P. Ossipkov</i>	295
The velocity variation of stars as a purely discontinuous random process. III. The stars of different masses in open clusters <i>V. S. Kaliberda, I. V. Petrovskaya</i>		305
On the dynamics of gravitating systems against the neutrino background of the universe	<i>T. B. Omarov</i>	315

N u m b e r 3

The spectra of Markarian galaxies. VI <i>M. A. Arakelian, E. A. Dibay, V. F. Yesipov</i>		329
Preliminary data on the optical variability of the NGC 4486 jet <i>V. I. Pronik, A. G. Scherbakov</i>		337
Observations of circular polarization in white dwarfs and in the nuclei of planetary nebulae	<i>O. S. Shulov, E. T. Belokon</i>	343
Scattering of resonance radiation in a sphere	<i>D. I. Nagtrner</i>	353
On the form of novae shells	<i>V. G. Gorbatskii</i>	369
On novae explosions in close binary systems <i>A. V. Tutukov, L. R. Yungelson</i>		381
Radial pulsations of the white dwarf in the case of non-uniform rotation <i>M. M. Basko, V. S. Imshennik</i>		387
Evolution of a white dwarf with accretion of hydrogen rich matter. II <i>Yu. N. Redkoborody</i>		393

Quasiradial pulsation of rotating relativistic polytropes	
<i>V. V. Papogan, D. M. Sedrakian, E. V. Chubartan</i>	405
Pulsation and stability of flattened out white dwarfs . . .	<i>Yu. L. Vartanian</i> 413
The stability of barion stars	<i>G. G. Harutyunian, D. M. Sedrakian</i> 419
Analytical expressions of the parameters of rotating stars	
<i>O. H. Guseinov, F. K. Kasumov</i>	425
On the stability of a rotating inhomogeneous star	<i>Yu. V. Vandakurov</i> 433
Relativistic turbulent plasma in pulsars	<i>V. N. Tsytovich, S. A. Kaplan</i> 441
Spectrum of sources radiation moving along a stable circular orbit near the rotating "black hole"	<i>A. G. Polnarev</i> 461

NOTES

Estimation of the brightness of selected Markarian galaxies. II.	
<i>M. A. Arakelian, E. A. Dibay, V. M. Lyutty</i>	473
Energy in rotating neutron stars	
<i>R. M. Avaktan, G. G. Harutyunian, G. S. Sahaktan</i>	476
The flare possibilities of white dwarfs	<i>G. A. Gurzadian</i> 479

N u m b e r 4

Flare stars in Pleiades. III	
<i>V. A. Ambartsumian, L. V. Mirzoyan, E. S. Parsamian, H. S. Chavushian, L. K. Erastova, E. S. Kazartan, G. B. Ohanian</i>	485
On the variability of the optical radiation of the nuclei of Seyfert galaxies	
<i>M. K. Babadzhaniants, V. A. Hagen-Thorn, V. M. Lyutty</i>	509
The spectral investigation of galaxy Markarian 8	<i>E. Ye. Khachikyan</i> 529
To the theory of white dwarfs	
<i>G. S. Sahaktan, D. M. Sedrakian, E. V. Chubartan</i>	541
The magnetic fields of pulsars	<i>D. M. Sedrakian, K. M. Shahabastan</i> 557
The pulsars in supernova remnants	
<i>P. R. Amnuel, O. H. Guseinov, F. K. Kasumov</i>	561
Shock waves in the gaseous streams in close binary systems of dwarf stars	
<i>V. I. Taranov</i>	567
The resonance damping of oscillations in a model of the spherical star cluster	
<i>V. S. Stnakh, A. M. Fridman, I. A. Shukhman</i>	577
On the absorption of super-high energy photons in the universe	
<i>S. G. Matinian</i>	587
The sound vibration in cosmic magneto-active space . . .	<i>E. Ya. Gidalevich</i> 591

On the stability of the spheroids extracted along the axis of rotation by toroidal magnetic field	<i>R. S. Hovanesian, M. G. Abramian</i>	599
On the possibility of superlight radiation in pulsar's conditions	<i>V. Ya. Eidman</i>	609
Cold stars in O- clusters	<i>R. A. Vardanian N. G. Khatchatrian</i>	613
NOTES		
The circular polarization observation of SCO X-1	<i>O. S. Shulov, E. N. Kopatskaya</i>	621
The relation between the gradient of surface brightness and other properties of Seyfert galaxies	<i>M. A. Arakellian</i>	624
A letter to the Editor	<i>B. Ye. Markarian</i>	628
