

## INDEX OF AUTHORS

|                                                                                                                                                    |     |
|----------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <i>Abrahamian M. G., Kaplan S. A.</i> On the equilibrium and stability of spheroidal subsets . . . . .                                             | 565 |
| <i>Akhundova G. V., Guseinov O. Kh., Rakhimov Sh. Y.</i> The determination of the types of the galactic remaining stars of (SNR) . . . . .         | 85  |
| <i>Amnuel P. R., Guseinov O. H.</i> On the physical nature of galactic X-ray sources . . . . .                                                     | 417 |
| <i>Andreastan N. K.</i> (see <i>Arp C. H.</i> ) . . . . .                                                                                          | 298 |
| <i>Andreastan N. K.</i> (see <i>Arp C. H.</i> ) . . . . .                                                                                          | 625 |
| <i>Andreastan N. K.</i> (see <i>Khachikyan E. Ye.</i> ) . . . . .                                                                                  | 297 |
| <i>Anikonov A. S.</i> On the diffuse reflection of light by semi-infinite medium . . . . .                                                         | 227 |
| <i>Antonov V. A., Nuritdinov S. N.</i> On the role of irregular forces in weakly non-stationary self-gravitating systems . . . . .                 | 611 |
| <i>Arakelian M. A.</i> On the surface brightness of emission line galaxies . . . . .                                                               | 507 |
| <i>Arp C. H., Heldmann J., Khachikyan E. Ye.</i> Remarkable pairs of double galaxies . . . . .                                                     | 7   |
| <i>Arp C. H., Khachikyan E. Ye.</i> Markarian 94 and its connection with the galaxy III Zw 0843+51 . . . . .                                       | 173 |
| <i>Arp C. H., Sargent W. L. W., Khachikyan E. Ye., Andreastan N. K.</i> On the spectrum of the blue object near irregular galaxy NGC 520 . . . . . | 298 |
| <i>Arp C. H., Khachikyan E. Ye., Andreastan N. K.</i> Markarian 459 a member of the triple system of galaxies . . . . .                            | 625 |
| <i>Baier F. W., Petrosian M. B., Tiersch H., Shahbazian R. K.</i> Compact groups of compact galaxies. III . . . . .                                | 327 |
| <i>Bakhtan G. G., Garibian G. M., Yang C.</i> X-ray transition radiation formed in the molecular clouds. . . . .                                   | 93  |
| <i>Börngen F., Kalloghlian A. T.</i> Four-colour photometry of compact groups of compact galaxies . . . . .                                        | 21  |
| <i>Börngen F., Kalloghlian A. T.</i> Four-colour surface photometry of Markarian galaxies. I. Galaxies No. 7 and 8 . . . . .                       | 159 |

|                                                                                                                                           |     |
|-------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <i>Börnngen F.</i> (see <i>Kalloglian A. T.</i> ) . . . . .                                                                               | 295 |
| <i>Borchkhadze T. M.</i> A detail three colour photometry of galaxies NGC 4145, 4151, 4156 and MKG 7—25—46, 48 . . . . .                  | 493 |
| <i>Bretz M., Mirzoyan L. V., Oskantian V. S.</i> Photoelectric observations of SS Cygni . . . . .                                         | 39  |
| <i>Cherepashchuk A. M.</i> The variability of single Wolf-Rayet stars in the continuum and emission lines . . . . .                       | 347 |
| <i>Cherepashchuk A. M.</i> (see <i>Zaytseva G. V.</i> ) . . . . .                                                                         | 357 |
| <i>Chernin A. D.</i> On the origin of rotation of galaxies . . . . .                                                                      | 535 |
| <i>Chuvaev K. K.</i> (see <i>Karachentsev I. D.</i> ) . . . . .                                                                           | 441 |
| <i>Chuvaev K. K.</i> (see <i>Koptlov I. M.</i> ) . . . . .                                                                                | 483 |
| <i>Dantlov V. M.</i> Dissipation of stars in open stellar clusters NGC 188 . . . .                                                        | 387 |
| <i>Deming D.</i> (see <i>Toumassian H. M.</i> ) . . . . .                                                                                 | 337 |
| <i>Dentsyuk E. K., Lipovetsky V. A.</i> Spectral observations of Markarian galaxies .                                                     | 315 |
| <i>Domke H.</i> Polarized radiation in deep layers of a semi-infinite atmosphere . .                                                      | 205 |
| <i>Eminzade T. A.</i> Energy release due to compression of a white dwarf envelope in the process of its cooling . . . . .                 | 399 |
| <i>Garibian G. M.</i> (see <i>Bakhsian G. G.</i> ) . . . . .                                                                              | 93  |
| <i>Glagolevsky Yu. V., Kozlova K. L., Polosukhina N. S.</i> [A spectrophotometric study of the magnetic variable star 21 Per. I . . . . . | 517 |
| <i>Gorbatskii V. G., Ivanov L. N.</i> On the continuous outflow of matter during the postmaximum stage of Nova . . . . .                  | 73  |
| <i>Green R. F.</i> (see <i>Toumassian H. M.</i> ) . . . . .                                                                               | 337 |
| <i>Grinin V. P.</i> Resonance radiation transfer in moving media. Approximation methods . . . . .                                         | 239 |
| <i>Gurzadlan G. A., Kashin A. L., Krmoyan M. N., Ohanesian J. B.</i> Ultraviolet spectrograms of stars obtained by „Orion-2” . . . . .    | 177 |
| <i>Gurzadlan G. A.</i> A remarkable „ultraviolet” star discovered by „Orion-2” . .                                                        | 379 |
| <i>Guselnov O. Kh.</i> (see <i>Akhundova G. V.</i> ) . . . . .                                                                            | 85  |
| <i>Guselnov O. Kh., Novruzova Kh. I.</i> Why do relativistic stars avoid duplicity ?                                                      | 273 |
| <i>Hagen-Thorn V. A.</i> Polarization of optical radiation of extragalactic objects                                                       | 127 |
| <i>Haro G.</i> (see <i>Toumassian H. M.</i> ) . . . . .                                                                                   | 337 |
| <i>Heidmann J.</i> (see <i>Arp C. H.</i> ) . . . . .                                                                                      | 7   |
| <i>Hovsepyan A. V.</i> The evolution of the rotating white dwarfs with the outflow of the matter . . . . .                                | 99  |

|                                                                                                                                          |     |
|------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <i>Ingel L. H.</i> On some possible manifestations of the gravitational lens effect . . . . .                                            | 555 |
| <i>Ivanov V. V.</i> Asymptotic properties of radiation fields in semi-infinite atmospheres . . . . .                                     | 193 |
| <i>Ivanov L. N.</i> (see <i>Gorbatskii V. G.</i> ) . . . . .                                                                             | 73  |
| <i>Kalloghlian A. T., Börngen F.</i> A narrow system of blue galaxies . . . . .                                                          | 295 |
| <i>Kalloghlian A. T.</i> (see <i>Börngen F.</i> ) . . . . .                                                                              | 21  |
| <i>Kalloghlian A. T.</i> (see <i>Börngen F.</i> ) . . . . .                                                                              | 159 |
| <i>Kaplun S. A.</i> (see <i>Abrahamian M. G.</i> ) . . . . .                                                                             | 565 |
| <i>Karachentsev I. D., Pronik V. I., Chuvaev K. K.</i> The remarkable pair of compact galaxies . . . . .                                 | 441 |
| <i>Karachentseva V. Ye., Kostyuk I. P.</i> The dwarf galaxies in the M 81 group . . . . .                                                | 632 |
| <i>Kashin A. L.</i> (see <i>Gurzadian G. A.</i> ) . . . . .                                                                              | 177 |
| <i>Katsev I. L., Zege E. P.</i> On the connection between nonstationary radiation fields in absorbing and nonabsorbing media . . . . .   | 219 |
| <i>Kazarinn M. A., Khachiklan E. Ye.</i> Spectroscopic observations of six new galaxies with ultraviolet continuum . . . . .             | 477 |
| <i>Kipper A. Ya.</i> On the essence of cosmological redshift . . . . .                                                                   | 283 |
| <i>Khachiklan E. Ye., Andreastan N. K., Sargent W. L. W.</i> Determination of the redshift of irregular galaxy HGC 5360 . . . . .        | 297 |
| <i>Khachiklan E. Ye.</i> (see <i>Arp C. H.</i> ) . . . . .                                                                               | 7   |
| <i>Khachiklan E. Ye.</i> (see <i>Arp C. H.</i> ) . . . . .                                                                               | 173 |
| <i>Khachiklan E. Ye.</i> (see <i>Arp C. H.</i> ) . . . . .                                                                               | 298 |
| <i>Khachiklan E. Ye.</i> (see <i>Arp C. H.</i> ) . . . . .                                                                               | 625 |
| <i>Khachiklan E. Ye.</i> (see <i>Kazarian M. A.</i> ) . . . . .                                                                          | 477 |
| <i>Kolotilov E. A., Zaytseva G. V.</i> Variations of emission H $\alpha$ and H $\beta$ line profiles in the spectrum of RY Tau . . . . . | 365 |
| <i>Kopatskaya E. N.</i> (see <i>Shulov O. S.</i> ) . . . . .                                                                             | 117 |
| <i>Kopatskaya E. N.</i> (see <i>Shulov O. S.</i> ) . . . . .                                                                             | 120 |
| <i>Koptlov I. M., Lipovetsky V. A., Pronik V. I., Chuvaev K. K.</i> Spectral observations of Markarian galaxies . . . . .                | 483 |
| <i>Kostyuk I. P.</i> (see <i>Karachentseva V. Ye.</i> ) . . . . .                                                                        | 632 |
| <i>Kozlova K. L.</i> (see <i>Glagolevsky Yu. V.</i> ) . . . . .                                                                          | 517 |
| <i>Krmoyan M. N.</i> (see <i>Gurzadian G. A.</i> ) . . . . .                                                                             | 177 |
| <i>Lipovetsky V. A.</i> (see <i>Markarian B. E.</i> ) . . . . .                                                                          | 307 |

|                                                                                                                         |     |
|-------------------------------------------------------------------------------------------------------------------------|-----|
| <i>Lipovetsky V. A. (see Koptlov I. M.)</i> . . . . .                                                                   | 483 |
| <i>Lipovetsky V. A. (see Dentsguk E. K.)</i> . . . . .                                                                  | 315 |
| <i>Lyuty V. M. (see Zaytseva G. V.)</i> . . . . .                                                                       | 357 |
| <i>Malov I. F. On the acceleration of matter in -Wolf-Rayet stars by Thomson scattering</i> . . . . .                   | 575 |
| <i>Malumtjan V. G., Sanamtan V. A. A remark on variability of the 3C 454 at 408 CHz</i> . . . . .                       | 631 |
| <i>Markartian B. E., Lipovetsky V. A. Galaxies with ultraviolet continuum. VII</i> . . . . .                            | 307 |
| <i>Melik-Alaverdian Yu. K. On a possible mechanism of the formation of deuterium in the nucleus of galaxy</i> . . . . . | 123 |
| <i>Melik-Alaverdian Yu. K. On the gas movement in galactic nuclei</i> . . . . .                                         | 627 |
