

CONTENTS

Number 1

The new galaxies with UV-excess	<i>M. A. Kazartan</i>	5
Poor cluster of galaxies containing four absolutely bright Markarian galaxies <i>M. Joeveer, A. Kaastk, J. Etnasto</i>		19
Radial velocities and masses for 44 binary galaxies <i>I. D. Karachentsev, W. L. W. Sargent, B. Zimmermann</i>		25
Compact groups of compact galaxies. X.	<i>F. W. Baler, H. Tiersch</i>	33
NGC 1275 is a pair of interacting galaxies	<i>L. P. Metik, I. I. Pronik</i>	37
The Lurat phenomenon in the galaxy NGC 1275	<i>V. I. Pronik</i>	51
The dependence of emission line intensities of Seyfert galaxies of type 1 upon colour index	<i>G. T. Petrov</i>	59
Cosmological evolution of quasars and energy source models	<i>A. S. Zentsova</i>	67
The photometric study and a short-time periodicity of RR Tau <i>G. V. Zaytseva, V. M. Lyuty</i>		75
The investigation of Paschen hydrogen lines and the infrared Ca II triplet in the spectrum of the magnetic star δ CrB <i>N. S. Polosukhina, N. G. Scherbakov, V. P. Malanushenko</i>		85
Galactic disk gamma-rays and inverse compton scattering of the high energy electrons on starlight	<i>V. P. Fomin</i>	97
On the problem of kinematics of the galactic planetary nebulae <i>M. N. Kioasa, G. S. Khromov</i>		105
On the origin of rotation and magnetism of stars and planets	<i>I. N. Minin</i>	121
On the origin of excess of heavy elements in late-type stars <i>Yu. K. Melik-Alavesdian</i>		129
The magnetosphere of the barionic stars. II. Inclined rotator	<i>A. K. Avetisyan</i>	135
Blurring of lines before the limit of hydrogen series <i>L. N. Kurochka, I. B. Ribko</i>		155
The propagation of waves in the media of high radiation pressure. II. Astro- physical applications	<i>G. S. Bisnovatyi-Kogan, S. I. Blinnikov</i>	165
A study of the effect of relativity change of mass of the electrons with velo- city on the M-R relations for a cold spherical body	<i>J. P. Sharma</i>	179

NOTES

- Revealing of new details in the N_5 -line profile in the spectrum of Markarian 372 by application of Fourier analysis of space frequencies
V. N. Popov, R. A. Sarkisyan, E. Ye. Khachikyan 189

Number 2

- The new galaxies with UV-excess. II *M. A. Kazarian* 193
- Galaxies with ultraviolet continuum. XII
B. E. Markarian, V. A. Litovetsky, J. A. Stepanian 201
- Spectroscopic investigation of UV-galaxies with double and multiple nuclei. I.
A. R. Petrosian, K. A. Sahakyan, E. Ye. Khachikyan 209
- An analysis of Turner's sample of binary galaxies
I. D. Karachentsev, B. I. Fessenko 217
- The calculation of the spectrum of the integral equation of radiative transfer
 I. Semi-infinite medium *D. I. Nagtner* 229
- Polarization of scattered light in atmospheres with embedded sources
V. M. Loskutov, V. V. Sobolev 241
- The plasma waves in a relativistic strongly anisotropic plasma, propagating along the magnetic field *O. G. Onishchenko* 253
- The distance and the galactic distribution of the planetary nebulae
G. S. Khromov 269
- Calculation of ionization and line emission of T Tau nebula
V. V. Golovatyj, I. V. Shpychka, O. S. Yatsyk 285
- Intrinsic polarization of radiation of the infrared carbon star IRC + 10216 (CW LEO) *N. A. Silant'ev, G. V. Khozov* 297
- On the relation of Trapezium type multiple systems with associations, galactic clusters and emission nebulae *G. N. Salukvadze* 311
- The stellar convection equations. I. The ensemble averaging *V. I. Kovshov* 319
- On the spectrum of stellar flare light *G. A. Gurzadyan* 335
- On the thermal instability behind the radiative shock *Yu. A. Schektnov* 347
- NOTES
- Spectral energy distribution of some early-type stars with gas-dust shells in near infrared
V. S. Avetisyan, V. V. Kirjan, M. A. Pogodin, Ju. L. Shahbaskan 355
- The form of quantum vortexes in the rotating neutron stars
D. M. Sedrakyan, G. K. Savvidi 359

Number 3

Galaxies with ultraviolet continuum. XIII	
<i>B. E. Markarian, V. A. Lipovetsky, J. A. Stepanian</i>	363
Spectroscopic investigation of UV-galaxies with double and multiple nuclei. II.	
The galaxies with Seyfert type nuclei	
<i>A. R. Petrossian, K. A. Sahakian, E. Ye. Khachikyan</i>	373
Physical conditions in the nuclei of Seyfert galaxies of type 1	
<i>G. T. Petrov</i>	383
Compact galaxies in the vicinity of the cluster A 2255	
<i>F. Börngen, A. T. Kalloghlian</i>	393
Theoretical light curves of supernovae	<i>V. V. Sobolev</i> 401
On the frequency of supernovae	
<i>R. G. Mnatsakanian, A. V. Oskanian, L. Lovash</i>	413
Synchronous UVB-observations of the UV Ceti flares. I	
<i>N. N. Kilyachkov, N. D. Melikian, L. V. Mirzoyan, V. S. Shevchenko</i>	423
On the interpretation of flare phenomenon on red dwarf stars by inverse compton scattering	
<i>H. A. Haruthyunian, R. A. Krikorian, A. G. Nikoghossian</i>	431
The system of the galactic planetary nebulae, the evolution of their nuclei	
<i>G. S. Khromov</i>	445
On emission lines of Mg II and Ca II in planetary nebulae .	<i>G. A. Gurzadyan</i> 461
The evolution of entropy perturbations at the post-recombination epoch. I.	
The linear stage	<i>A. S. Zentsova, A. D. Chernin</i> 473
The calculation of the spectrum of the integral equation of radiative transfer.	
II. The plane layer of finite optical thickness	<i>D. I. Nagtner</i> 483
Rotating superdense configurations taking in account the pionisation of the matter	
<i>G. G. Haruthyunian, V. V. Papoyan, A. V. Sarkisyan, E. V. Chubarian</i>	497
NOTES	
On the neutrino luminosity of magnetic stars in convergent models	
<i>I. V. Skobelev</i>	503
The configurations of degenerated masses according to the Rosen bimetric theory of gravitation	
<i>A. V. Sarkisyan, B. V. Khachatryan, E. V. Chubarian</i>	506
Letter to the editor	
<i>G. M. Tovmassian, E. Ts. Shahbazian, M. S. Shtrbaktan</i>	513
REVIEWS	
Pulsars	<i>M. A. Mnatsakanian</i> 515
Modelling of the pulsars behaviour in a low temperature laboratory	
<i>J. S. Tsakadze, S. J. Tsakadze</i>	533

Number 4

Galaxies with ultraviolet continuum. XIV <i>B. E. Markarian, V. A. Lipovetsky, J. A. Stepanian</i>	549
Spectrophotometry of the Seyfert galaxy Markarian 744 <i>V. L. Afanas'ev, V. A. Lipovetsky, A. I. Shapovalova</i>	557
Spectrophotometric studies of M 82 type irregular galaxies. II. NGC 972 and NGC 4433 <i>N. K. Andreassian, E. Ye. Khachikyan</i>	577
Radial velocities of 102 isolated galaxies <i>V. E. Karachentseva, I. D. Karachentsev</i>	589
Clusters of clusters of galaxies <i>B. I. Fessenko</i>	599
Synchronous UBV-observations of the UV Ceti flares. II. <i>N. N. Kilyachkov, N. D. Melikian, L. V. Mirzoyan, V. S. Shevchenko</i>	605
A spectrophotometry of NGC 2261 and R Mon. II. <i>J. L. Greenstein, M. A. Kazarian, T. Yu. Maghakyan, E. Ye. Khachikyan</i>	615
The spectrum of the planetary nebula Hu-2-1 VV 208 in the red and the near infrared <i>R. I. Noskova</i>	631
On the causes of low gas content in elliptical galaxies <i>V. V. Gorbatsky</i>	637
On the growth of temperature within neutron stars <i>V. A. Urpin, D. G. Yakovlev</i>	647
Slowly rotating incompressible configurations according to the bimetric theory of gravitation <i>A. V. Sarkisyan, E. V. Chubartan, A. S. Gevorgyan</i>	657
The stellar convection equations. II. The system close <i>V. I. Kovshov</i>	671
The theory of gas dynamical processes in proto-clusters <i>A. S. Silbergliet, A. D. Chernin</i>	689
NOTES	
Observations of Markarian galaxies on the radio telescope RATAN-600 <i>V. A. Sanamyan, R. A. Kandallan</i>	701
The observations of Herbig-Haro objects at 3.60 GHz <i>R. A. Kandallan, V. A. Sanamyan</i>	705
The photometry of some late-type emission stars at 1.47–2.39 μ m <i>V. S. Avetisyan, V. V. Ktryan, Yu. K. Melik-Alaverdyan, H. M. Tovmassian</i>	707
New emission-line stars in a region in Sygnus <i>G. Welin</i>	712
Photometrical investigation of H ₂ O-absorption bands in the near IR of young stars with circumstellar envelopes <i>M. A. Pogodin</i>	714
