

A. Alaverdyan, V. Karakhanyan and V. Tonoyan Data Flow Analysis By Linear Programming Model	5
A. Alaverdyan Linear Programming With Changing Coefficients Of Objective Function	11
R. Ahlswede, E. Haroutunian On Statistical Hypotheses Optimal Testing and Identification	16
S. Nigyan and A. Hambardzumyan On Interpreters of Logic Programming Systems	34
M. Haroutunian Bounds of E-capacity Region for Multiple-access Channel With Random Parameter	42
R. Kamalian, V. Mkrtchyan On Special Maximum Matchings Constructing	62
E. Haroutunian, P. Hakobyan On Logarithmically Asymptotically Optimal Hypothesis Testing of Three Distributions for Pair of Independent Objects	76
V. Mkrtchyan On Trees with a Special Proper Partial 0-1	82
R. Kamalian, P. Petrosyan On Interval Edge Colorings of Harary Graphs $H_{2n-2,2n}$	86
M. Haroutunian, S. Tonoyan On Information Hiding System With Multiple Messages	89
V. Mkrtchyan A Note on Matching Covered Graphs	104
T. M. Galoyan Analysis of Case Splitting in an Arithmetical System	107
A. Авагян, А. Милетбашян О генерации среды фильтрации избыточной информации с использованием шаблонов	120
K. Мкртчян О статистическом подходе к обнаружению нарушений в телефонных сетях	125
M. Grigoryan An Efficient and Robust Access Method for Indexing of Spatial Objects	133
C. Варданян Распознавание по пересечениям множеств	144
Мигран С. Григорян Некоторые методы сжатия данных и их индексов в СУБД	147
