

G. Hrachyan The basic semantics of untyped functional programs and reduction strategies	5
A. Ghandilyan and Z. Margaryan One error and in the given interval two error correcting code for the additive communication channel	14
L. Rafayelyan The minimum linear arrangement problem on bipartite Γ -oriented graphs	23
S. Badalyan and S. Markosyan The stable set number for the strong product of generalized cycles	27
S. Badalyan The clique covering number for the strong product of generalized cycles	35
R. Barseghyan A modified algorithm of fast Fourier transform	39
R. Adamyan and S. Markosyan Selection of output elements by minimum cost flow algorithm	45
Y. Barseghyan Pointwise reconstruction of interferometric phase	48
A. Yessayan On reliability approach to identification of probability distributions of two statistically dependent object	56
E. Haroutunian and L. Navael On optimal identification of Markov chain distribution subject to the reliability criterion	65
P. Petrosyan and A. Shashikyan On interval total colorings of trees	70
L. Navael On reliable identification of two independent Markov chain distributions	74
P. Petrosyan and N. Khachatryan Interval total colorings of graphs with a spanning star	78
A. Gevorkyan and Ar. Gevorkyan Maxwell electrodynamics subjected to quantum vacuum fluctuations	86
D. Asatryan and S. Talryan Robust audio watermarking algorithm	96
N. Safaryan Detection and classification of objects by applying genetic programming	101
Н. Давтян О наименьшем и наибольшем возможных числах вершин с интервальным спектром на множестве правильных раскрасок дерева	107
Г. Авагян Об асимптотике коэффициентов представления правильно меняющихся распределений	112
A. Мурадян Исследование устойчивости информационной базы данных кадров на основании анализа характера ротационных потоков	116
