

Contents

M. Haroutunian, L. Ter-Vardanyan and A. Muradyan Upper and Lower Bounds of Biometric Identification <i>E</i> -Capacity	7
T. Margaryan On the Shannon Cipher System with Correlated Source Outputs and Guessing Wiretapper Eavesdropping through a Noisy Channel	17
E. Haroutunian, P. Hakobyan and F. Hormozi nejad On Two-stage Logarithmically Asymptotically Optimal Testing of Multiple Hypotheses Concerning Distributions from the Pair of Families	25
S. Vardanyan On Maximal Dead-end Recognizing Systems in the Class of Two-Element Subsets Concerning Operations of Intersection and Complement	35
N. Afshar Sphere Packing Bound for <i>E</i> -capacity of Secrecy Leakage of the Broadcast Channel With Confidential Messages	39
L. Minasyan An Algorithm of Digital Image Interpolation	45
M. Khachatryan Least Squares Fitting with Cubic Splines	53
S. Manukian Some Algebraical and Logical Properties of Two-dimensional Arithmetical Sets Representable in Presburger's System	64
A. Jivanyan A New Approach to Receipt-Free E-Voting	75
G. Khachatryan and N. Malkhasyan Overview of Methods of Biometric Based Key Protection	83
A. Khachaturian Optimal Permissible Placement by the Height of the Transitive Directed Tree with One Root	88
G. Karapetyan Modification of FSE Method Based on Coefficients of Homogeneity	90
A. Khachaturian Necessary Conditions for Optimal Permissible Placement by the Height of the Transitive Directed Tree with One Root (part second)	103
