

CONTENTS

Number 1

Spectra of galaxies with UV-continuum. I <i>B. E. Markarian, V. A. Lipovetsky, J. A. Stepanian</i>	5
The new galaxies with UV-excess. III <i>M. A. Kazarian, E. S. Kazarian</i>	17
Compact galaxies in the field $07^h59^m+54^\circ44'$ · <i>F. Börngen, A. T. Kalloghlian</i>	25
Observations of galaxies of high surface brightness with the radio telescope RATAN-600 · · · · · <i>V. H. Malumian</i>	31
Spectrophotometry of the nucleus of SY 2 galaxy Markarian 308 <i>V. N. Popov, E. Ye. Khachtkian</i>	39
The luminosity function of Seyfert galaxies · · · · · <i>V. Yu. Terebizh</i>	45
Zodiacal light and the counts of galaxies · · · · · <i>M. M. Jõebeer</i>	63
Determination of the galaxy spiral structure parameters from HI at 21 cm. II. Non-linear theory. $30^\circ \leq l \leq 60^\circ$ · · · <i>V. G. Berman, Yu. N. Mityurov</i>	73
Slow flares in aggregates. I. · · · · · <i>E. S. Parsamian</i>	87
On the flare star statistics · · · · · <i>L. V. Mirzoyan, G. H. Brutian</i>	97
Flare activity of BY DRA <i>A. S. Melkontian, K. Olah, A. V. Oskanian Jr., V. S. Oskanian</i>	107
Interconfiguration transitions of C III, N IV, OV in spectra of Wolf-Rayet stars · · · · · <i>A. F. Kholtygin</i>	115
The radiation pressure in spectral lines in the medium with supersonic axisymmetric motions. II. Systems of gas and dust with local radiative coupling · · · · · <i>V. P. Grinin</i>	123
The broadening of spectral lines by electron scattering. III. The scattering in emission line · · · · · <i>V. G. Vedmich</i>	139
Non-linear running waves of stellar density in model of a homogeneous medium. II. Thin layer · · · · · <i>S. N. Nuritdinov</i>	153
Relativistic Langmuir solitons in magnetosphere of pulsars <i>G. I. Melikidze, A. D. Pataraya</i>	161
The evolution of entropy perturbations at the post-recombinations epoch. II. The non-linear stage · · · · · <i>A. S. Zentsova, A. D. Chernin</i>	169
