

CONTENTS

Number 1

Isolated triplets of galaxies. New radial velocities <i>I. D. Karachentsev, V. E. Karachentseva</i>	5
Spectrophotometry of the central region of the galaxy Markarian 290 <i>I. I. Pronik, L. P. Metik</i>	19
Polarization and photometric investigation of the peculiar galaxy NGC 3718 <i>V. A. Hagen-Thorn, I. I. Popov, V. A. Yakovleva</i>	35
Physical conditions in the nuclei of the emission-line galaxies <i>G. T. Petrov, I. M. Yankulova, V. K. Golev</i>	43
The mean surface brightness of the single and double galaxies <i>M. A. Arakelian, A. P. Mahtessian</i>	53
The function of the distribution of numbers of faint galaxies · <i>L. M. Fessenko</i>	61
Flare stars in Pleiades. VI <i>L. V. Mirzoyan, H. S. Gharushian, G. B. Ohanian, V. V. Hambartyan, A. T. Gharibjanian, N. D. Melikian, R. Sh. Natsvlishvili</i>	71
A phenomenological model of the antiflare star RZ PSC · <i>A. F. Pugach</i>	87
Polarization of radiation scattered by an inhomogeneous atmosphere <i>V. M. Loskutov, V. V. Sobolev</i>	97
The radiative pressure in spectral lines in the medium with axial-symmetric supersonic motions. III. Gas and dust systems with large-scale radiative coupling · · · · · <i>V. P. Grinin</i>	109
The thermalization length of resonance radiation with partial frequency redistribution · · · · · <i>M. M. Basko</i>	125
On coherent properties of rotating star radiation <i>A. V. Manjós, S. V. Khmil'</i>	141
The field of radiation in a plane atmosphere with anisotropic scattering. An invariance relation · · · · · <i>E. G. Yanovitskij</i>	155
On the origin of planetary nebulae · · · <i>L. S. Pilyugin, G. S. Khromov</i>	167
NOTES	
About one peculiarity of the solution of conservative anisotropic scattering problems · · · · · <i>M. A. Mnatsakanian</i>	179
On the direction of coiling of galaxy spiral arms in double and multiple systems <i>N. G. Kogoshvili, T. M. Borchkhadze</i>	183

Slow rotation of neutron stars according to Jordan-Brenn-Dicke theory of gravitation	<i>V. I. Retal'n</i>	187
From the commission on the theme of the 6-meter telescope		193

Number 2

Photographic colorimetry of stellar flares in the Pleiades and Orion aggregates <i>L. V. Mirzoyan, H. S. Chavushian, N. D. Melikian, R. Sh. Natsvlishvili, G. B. Ohanian, V. V. Hambartan, A. T. Garibdjantian</i>		197
Slow brightness variations of by DRA <i>A. S. Melkontan, K. Olah, A. V. Oskantan, jr., V. S. Oskantan</i>		215
The wide-band S spectrophotometry of Carbon stars <i>A. Kh. Avetisyan, V. P. Zaitintan, Yu. K. Melik-Alaverdian, R. Kh. Hovhannessian, H. M. Tovmassian</i>		225
Morphology of the nine galaxies with UV-continua with double and multiple nuclei <i>Yu. P. Korovyakovskij, A. K. Petrossian, K. A. Sahakian, E. Ye. Khachikian</i>		231
Radial velocities of 44 interacting galaxies <i>V. P. Arkhipova, V. L. Afanasev, V. A. Dostal', A. V. Zasov, I. D. Karachentsev, R. I. Noskova, M. V. Saveleva</i>		239
Observations of galaxies of high surface brightness at 3.66 GHz <i>V. H. Malumtan</i>		245
Homogeneous sample of binary galaxies. I. Selection and projection effects <i>I. D. Karachentsev</i>		249
Active galaxies in groups of galaxies · <i>H. M. Tovmassian, E. Ts. Shahbazian</i>		265
On the nature of jet-like formations in radiogalaxies · · · <i>V. G. Gorbatsky</i>		273
The origin of the optical continuum of flares on red dwarfs <i>M. M. Katsova, A. G. Kosovichev, M. A. Livshits</i>		285
The Balmer decrements of T TAU stars · · · · · <i>N. A. Katysheva</i>		301
Heating mechanism for stellar winds of early-type stars · <i>E. Ya. Vilkowitscy</i>		309
On radiation deficiency of shell-stars in balmer continuum · <i>I. N. Chkhikvadze</i>		317
Connection between ultraviolet excess and lithium content in late giants <i>Yu. K. Melik-Alaverdian</i>		327
Evolution of MHD-waves in homogeneous isothermal medium <i>G. S. Btsnovaty-Kogan, S. B. Popov, Yu. P. Popov</i>		333
Rotating superdense stars · · · · · <i>V. F. Balek</i>		349
The structure and characteristics of turbulence interstellar clouds <i>L. N. Arshutkin, I. G. Kolesnik</i>		359
The generation of the large-scale structure by the mass ejection from the galaxy centre · · · · · <i>V. I. Korchagin, V. F. Rakhimov</i>		371
Gas condensation as a cause of the infrared excess in the cold nebulae spectra <i>M. E. Perel'man</i>		383

NOTES

Comments on the evaluation of the inverse compton flux <i>S. Kishenassamy, K. A. Krikorian</i>	395
Neutrino energy loss of nuclear matter <i>L. Sh. Grigorian</i>	398

Number 3

Velocity field of the Seyfert galaxy Markarian 744 <i>V. L. Afanasyev, A. I. Shapovalova</i>	403
The remarkable galaxy Markarian 314 with three condensations <i>A. R. Petrossian</i>	421
Homogeneous sample of binary galaxies. II. Orbital masses <i>I. D. Karachentsev</i>	429
Further observations of variable radio sources with RATAN-600 radiotelescope <i>V. A. Matzel', M. G. Mingaliev, S. A. Pustilnik, S. A. Trushkin</i>	445
The generation of spiral density waves by bar in differentially rotating disks <i>V. I. Korchagin, Yu. G. Shevelev</i>	455
The nonlinear theory of gravitational instability in the expanding collisionless medium <i>A. M. Shukurov</i>	469
Heating of the primordial gas by the background radiation if heavy elements were available . <i>D. A. Varshalovitch, V. K. Khersonsky, R. A. Sunyaev</i>	487
Space and ground based spectrophotometric observations of a group of F, G and K type stars <i>R. A. Epremtian</i>	495
The search of the short-time light variations in DF Tauri <i>V. S. Shevchenko, N. A. Shutymova</i>	509
On the rapid and slow variations in the spectrum of SU AUR <i>L. V. Timoshenko</i>	519
Polarization of radiation multiple scattered in a plane layer <i>V. M. Loskutov, V. V. Sobolev</i>	535
The law of movement of strong shock waves in stellar envelopes <i>I. A. Klimishin, B. I. Gnatyk</i>	547
On the evolutionary connection between fuors and T TAU type stars <i>Yu. K. Melik-Alaverdian</i>	557
The abundance of He in the atmosphere V 380 Cyg (the evolutionary status of the system) <i>V. V. Leushtin, L. I. Snezhko</i>	563

NOTES

New variable stellar objects with UV-continuum <i>V. A. Lipovetsky, J. A. Stepanian</i>	573
Apparent distribution of the carbon stars in the region $115^\circ < l < 126^\circ - 5^\circ < b < +5^\circ$ <i>O. M. Kurtanidze, M. A. Nikolashvili</i>	576
On the number of He-emission stars in the region of Orion nebula <i>E. S. Parsamian</i>	579
