

CONTENTS

Number 1

Narrow band photometry of normal and Seyfert galaxies <i>V. T. Doroshenko, V. Yu. Terebizh</i>	5
Gas in the nucleus of the Seyfert galaxy NGC 4151 <i>V. I. Pronik, I. S. Balinskaja</i>	17•
The second Byurakan spectral sky survey. I. Quasistellar and Seyfert objects <i>B. E. Markarian, V. A. Lipovetsky, J. A. Stepanian</i>	29
Spectrophotometric investigation of the irregular galaxy NGC 2814 <i>N. K. Andreassian</i>	45
Relative intensities of the hydrogen lines in the spectra of quasars and Seyfert nuclei <i>N. A. Katysheva</i>	55
Elliptical stellar disks: Equilibrium solutions in the presence of Halo and in binary systems <i>G. S. Btsnovatyl-Kogan</i>	65
The transfer of angular momentum in the galactic disk due to interaction of interstellar clouds <i>V. G. Gorbatsky, V. M. Serbin</i>	79
On accretion of intracluster gas on a galaxy <i>E. V. Volkov, L. N. Ivanov</i>	91
A geometric analysis of catalogues of galaxies <i>Sh. A. Guberman, A. G. Doroshkevich, E. V. Kotok, S. F. Shandarin</i>	97
The escape time of triple systems <i>T. A. Agektan, J. P. Anosova, V. V. Orlov</i>	111
Luminosities and other characteristics of stars with broad lines of H I in the Orion nebula cluster <i>T. E. Derviz</i>	119
The polarimetric observations of the nebula M 20 with filters <i>N. V. Voshchinnikov</i>	127
The magnetic field of pulsars is an analogue of the magnetic field of superconducting sphere <i>G. S. Mkrtchian, D. M. Sedrakian</i>	135
Positrons in the cosmic rays and associated galactic gamma-emission <i>F. A. Aharontan, V. G. Kirtilov-Ugryumov, Yu. D. Kotov</i>	139
Oblique waves propagation in the relativistic electron-positron plasma <i>M. E. Gedalin, G. Z. Machabeli</i>	153
Energies of electrons and angles between magnetic field and rotation axis in pulsars <i>I. F. Malov</i>	161

Notes

- On the double-nuclei galaxies Markarian 739 and 789
A. R. Petrossian, K. A. Sahakian, E. Ye. Khachikyan 171
- A high accuracy approximation of Ambartsumian's function
A. B. Schneewels 175
- On state equation of degenerate star matter *L. Sh. Grigorian* 177

Number 2

- Two-colour photometry of clusters of galaxies. I A 118
A. T. Kalloghlian, A. G. Egikyan, D. Nanni, D. Treves, A. Vignato 183
- B2 1101 + 38 (Mark 421): Polarization and photometric behaviour in the optical during 1974–1982
V. A. Hagen-Thorn, S. G. Marchenko, R. I. Smeshchev, V. A. Yakovleva 199
- New galaxies with UV-excess. V *M. A. Kazartan, E. S. Kazartan* 213
- Spectra of galaxies with UV-continuum. III.
B. E. Markurian, V. A. Lipovetsky, J. A. Stepanian 221
- Spectral observations of Markarian galaxies. III
E. K. Dentsyuk, V. A. Lipovetsky 229
- Spectral and morphological investigation of the Markarian galaxies 303 and 313
E. Ye. Khachikyan, A. R. Petrossian 239
- Emission line variability search of NGC 1275 galaxy nucleus spectrum in a scale of one day *N. I. Merkulova, I. I. Pronik* 245

Number 3

The spectral investigation of the galaxy Markarian 201 <i>A. N. Burenkov, A. R. Petrossian, E. Ye. Khachikyan</i>	393
A four-colour photometry of spiral galaxies. A comparison with Markarian galaxies <i>A. T. Kalloghlian, F. Börngen</i>	403
The new galaxy of the Seyfert type <i>M. A. Kazarian</i>	411
Investigation of morphological properties of 6 interacting galaxies. I <i>A. A. Korovyakovskaya</i>	419
Observations of the galaxies with ultraviolet continuum with the radio telescope RATAN-600 <i>V. A. Sanamian, R. A. Kandalian, G. A. Ohanian</i>	429
On the configuration of the radiogalaxies <i>R. R. Andrasian</i>	441
An attempt of identifying QSO spectral absorption lines with small redshifts <i>I. E. Waltz, B. V. Komberg</i>	449
Kinematical models of powerful radio galaxies and statistics of extended components <i>Yu. V. Baryshev</i>	461
Dynamics of interstellar clouds sweeping from a rotating galaxy during its way in intercluster medium <i>A. G. Kritsuk</i>	471

On the theory of X-ray emission from the extended galactic monogem ring source in monoceros constellation	<i>V. A. Krol'</i>	483
Features of the position of Sun in the galaxy	<i>L. S. Marochnik</i>	495
The atmospheric abundances, masses, radii and other parameters of four Am stars	<i>L. S. Lyubimkov, I. S. Savanov</i>	505
Photoelectric and spectral observations of WW Vul	<i>L. V. Timoshenko, G. K. Filip'gev</i>	513
The results of photoelectric observations of V 1057 Cygni	<i>A. V. Oskanian jr.</i>	525
Macrostructure of the ultraviolet continuous spectra of hot stars according to OAO-2 data	<i>S. S. Rustambekova</i>	53
The simple stellar dynamic model of the ring structure and its stability	<i>V. A. Antonov, S. N. Nuritdinov</i>	547
Shell-Like H II — Zone	<i>E. L. Logutnenko, Yu. A. Shchektinov</i>	553
Ionization equilibrium in rarefied gas. The effect of charge-exchange reactions	<i>A. A. Suchkov, Yu. A. Shchektinov</i>	569
Notes		
On the spectra of irregular galaxy NGC 2968	<i>E. Ye. Khachikyan, N. K. Andreassian</i>	575
On groupings of B stars in Puppis	<i>A. L. Ggulgudagtan</i>	578
On a particularity of cometary nebulae	<i>R. A. Vardanian</i>	579
On the irregularity of the MCG data caused by variability of observing conditions	<i>N. G. Kogoshvili</i>	584
On the proper motions and distribution of flare stars in the Pleiades	<i>A. L. Mirzogan</i>	588
Stability of non-relativistic configurations in the Jordan, Brans-Dicke theory	<i>S. M. Koztrev</i>	592
Reviews		
D. Mihalas, J. Binney, Galactic astronomy (structure and kinematics)	<i>V. A. Antonov</i>	505

Number 4

Polarimetric investigation of the peculiar galaxy NGC 2685	<i>V. A. Hagen-Thorn, I. I. Popov, V. A. Yacovleva</i>	599
Radial velocities and virial masses of some isolated triplets of galaxies	<i>V. E. Karachentseva, I. D. Karachentsev</i>	613

Superassociations in spiral galaxies with UV-excess. I <i>A. R. Petrosian, K. A. Sahakian, E. Ye. Khachikyan</i>	619
The morphology of the galaxies with UV-excess <i>A. A. Yegiazarian</i>	631
The second Byurakan spectral sky survey. I. <i>B. E. Markarian, J. A. Stepanian</i>	639
Observations of Byurakan classification frequency of 102 MHz <i>V. S. Artyukh, M.-A. Hovanisyan</i>	615
On the statistics of morphological types of the single galaxies of the components of pairs <i>M. A. Arakelian</i>	665
Distribution of the apparent magnitudes and the luminosities of double galaxies <i>M. A. Arakelian</i>	673
Non-LTE effect on determination of microturbulence in the atmospheres of F-type supergiants <i>L. S. Lyubimkov, A. A. Boyarchuk</i>	683
On the properties of stellar winds in early-type stars <i>I. N. Portnova, N. A. Sakhibullin</i>	697
On the theory of anisotropically scattered radiation, explicitly expressed for resolvent functions <i>E. Kh. Dantel'yan</i>	711
Polarimetric investigation of back-ground stars in the area of T and RY Tau <i>R. A. Vardanian, M. H. Ertsyan</i>	719
Photographic colorimetry of stellar flares in the Pleiades and Orion aggregates. II <i>L. V. Mirzoyan, H. S. Chavushyan, N. D. Melikian, R. Sh. Natsvlishvili, V. V. Hambartyan, G. H. Bruttan</i>	725
On interpretation of multicolour observations of the rapid irregular variables with unperiodic light fading <i>A. F. Pugach</i>	139
Trapezium line large systems <i>A. L. Gyulbudagian</i>	747
On plasma beam instabilities in the Pulsars' magnetospheres <i>V. D. Egorenkov, J. G. Lomnadze, P. G. Mamradze</i>	753
Determination of distance to interstellar clouds from OH absorption features <i>I. G. Kolesnik, L. V. Yurevich</i>	761
On the statistical likeness of high-velocity clouds and stars of spherical component of the galaxy <i>R. B. Shatsova</i>	779
On the equilibrium states of the collisionless gravitation sphere and disk <i>Z. Ya. Turakulov</i>	791
Inverse Compton reflection from the ionized nonrelativistic plasma <i>S. R. Kellen, E. S. Shikhovtseva</i>	803
Propagation of waves in the one-determinational relativistic electron-positron plasma <i>L. S. Kuz'menkov, P. A. Polyakov</i>	815

Notes	
Fluxes in the lines $H\beta$ [O III] λ 5007 and UBVR-magnitudes of 10 Markarian galaxies with active nuclei	
V. T. Doroshenko, V. A. Lipovetsky, Yu. V. Terebizh, A. T. Shapovalova	823
Radial velocity field of Markarian 7	826
A flare of radio line emission H_2O in W 49	
L. E. Abramtan, A. P. Vegner, I. V. Gosachinsky, R. A. Kandaltan, R. M. Martrossian, V. A. Sanamtan, N. A. Yudaeva	830
About one group of peripheral type	934
Synchronous UVB-observations of the UV Ceti flares	
N. D. Melikian, N. N. Kiljachkov, V. N. Igolkin	835
