

CONTENTS

Number 1

Spectrophotometry of the Seyfert galaxy NGC 4151 <i>V. A. Lipovetsky, A. I. Shapovalova</i>	5
Two-colour photometry of clusters of galaxies. II A 1213 <i>A. G. Egiklan, A. T. Kalloghlian, D. Nanni, D. Trevese, A. Vignato</i>	21
The second Byurakan sky survey. Spectra of galaxies. II <i>B. E. Markarian, V. A. Lipovetsky, J. A. Stepanian</i>	35
Investigation of morphological properties of some interacting galaxies. II <i>A. A. Korovgakovskaya</i>	43
Isodensitometry of the selected interacting galaxies <i>Yu. P. Korovgakovsky</i>	49
Superassociations in spiral galaxies with UV excess. III <i>A. R. Petrossian, K. A. Sahaktan, E. Ye. Khachiklan</i>	57
Spectrophotometry of two emission regions in the irregular galaxy NGC 3448 <i>N. K. Andreassian</i>	73
On the frequency of supernovae in Sb galaxies <i>R. G. Mnatsakanian</i>	81
Integral characteristics of the binary galaxies with tidal forces <i>G. S. Blsnovaty-Kogan</i>	87
On the relative orientations of radio source axes and parent elliptical galaxies <i>R. R. Andreassian</i>	93
The interaction of high-energy particles with the intergalactic gas <i>N. Ya. Sotnikova</i>	103
The MK classification and continuous spectra of early-type stars <i>E. V. Ruban</i>	111
The model of the phenomenon responsible for variations of polarization and 'brightness of μ Cep <i>T. A. Polyakova</i>	125
On a formation of a mass flow from Wolf-Rayet stars <i>I. F. Malou, V. I. Shishov</i>	137
The structure of massive molecular clouds <i>L. N. Arshutkin, I. G. Kolesnik</i>	147
On the determination of the stellar flare frequency distribution function <i>H. A. Haruthyanian</i>	163

The gravitational field of the concentrated mass in the generalized theory of gravity	<i>G. H. Haratyan, V. V. Papoyan</i>	175
---	--------------------------------------	-----

NOTES

GW 3-6: an enigmatic object	<i>T. Yu. Magakian</i>	183
New cometary nebulae and tight Trapezium-like systems	<i>A. L. Gyulbudaghian</i>	185
The important center of educational and scientific work on astrophysics	<i>V. G. Nagnibeda</i>	189

REVIEWS

The activity of red dwarf stars	<i>L. V. Mirzoyan</i>	207
---	-----------------------	-----

Number 2

Properties of the optical variability of 3C 345	<i>M. K. Babadjanlants, E. T. Belokon'</i>	217
Investigation of circumnuclear region in Seyfert galaxy NGC 1275	<i>L. P. Metik, I. I. Pronik</i>	233
Emission line galaxies in cluster A 634	<i>J. A. Stepanian</i>	245
Isodensitometry of the selected interacting galaxies. II	<i>Yu. P. Korovyakovsky</i>	255
The preferable orientation of Seyfert galaxies as the result of selection effect	<i>V. P. Reshetnikov</i>	263
Are the cells visible in a deep sample of galaxies?	<i>B. I. Fessenko</i>	269
On the formation of superhigh energy spectrum of cosmic rays in the nuclei of active galaxies	<i>F. A. Aharonian, A. S. Ambartsumian</i>	275
Results of radioastronomical observations of the lunar occultation of the Crab nebula of January 26.1983	<i>M. I. Agafonov, A. M. Aslanyan, A. P. Barabanov, I. T. Bubukin, A. G. Gultan, V. P. Ivanov, R. M. Martirosian, I. A. Maltshev, K. S. Stankevitch, S. P. Stolgarov</i>	283
On the spectral types of cool components of U Gem type stars	<i>G. H. Tovmassian</i>	289
Lagerr polynomial series for the Sobolev functions	<i>K. I. Selyakov</i>	295
On the asymptotic light regime in the outer layers of a homogeneous sphere of the large optical radius	<i>A. K. Kolesov</i>	309
The statistical description of radiation field on the basis of invariance principle. I. The mean number of scatterings in the medium illuminated from outside	<i>A. G. Nikoghosian</i>	323

A remark on the consideration of the motions of electrons in their interaction with photons in astrophysical problems	<i>G. T. Ter-Kazarian</i>	343
On the time of the achievement of ionization equilibrium in hot dilute gas	<i>K. A. Sidorov</i>	353
Some astrophysical consequences of dynamical interpretation of gravitation	<i>Yu. V. Baryshev, V. V. Sokolov</i>	361
Models on configurations from incompressible liquid taking into account the role of gravitational vacuum	<i>L. Sh. Grigorian</i>	367
Double-camera image converter for 6-meter telescope	<i>G. I. Bryukhnovich, L. V. Gyavgyansen, E. I. Zak, S. V. Lipatov, A. E. Melamid, V. A. Miller, V. S. Rylov, B. M. Stepanov, T. A. Skosyrskaya, E. I. Titkov</i>	379
The possibility of a slitless spectrograph on BTA and one meter Zeiss telescope	<i>N. A. Tikhonov, M. F. Shabanov</i>	387

NOTES

A Supernova in Zw 1 16.7+1.57	<i>R. K. Shahbazian, F. Börngen</i>	393
Cosmological constant and rotation of the Universe . .	<i>R. M. Muradian</i>	396

REVIEWS

Trapezium type multiple systems . .	<i>L. V. Mirzoyan, G. N. Salukvadze</i>	399
-------------------------------------	---	-----

Number 3

Spectra of galaxies with UV continuum. IV	<i>B. E. Markarian, V. A. Lipovetsky, J. A. Stepanian</i>	419
A spectral investigation of galaxy Markarian 111	<i>A. N. Burenkov, A. R. Petrossian, K. A. Sahakian, E. Ye. Khachikyan</i>	433
Luminosity function of faint galaxies with UV continuum .	<i>J. A. Stepanian</i>	445
Gas and dust emission in the galaxy clusters in the radiowave region	<i>V. K. Khersonsky, N. V. Voshchinnikov</i>	461
A possible mechanism of the kinetic energy dissipation of plasma streams in radiogalaxies	<i>V. N. Morozov</i>	475
Brightness distribution of synchrotron radiation in the dipole magnetic field and the nature of double radiosources	<i>Yu. L. Ziskin, A. A. Stepanian</i>	487
Collisionless counterparts of the Rieman ellipsoids: the self-consistent ellipsoidal model with oblique rotation	<i>B. P. Kondrat'ev</i>	499
On the cometary nebula Parsamian 21	<i>V. M. Petrossian</i>	523
The pairs of the pulsars possibly jointed in the past in binary systems	<i>B. M. Vladimirovsky</i>	535

Magnetic moments of the neutron stars from real barion gas <i>D. M. Sedrakian, K. M. Shahabassian, A. G. Movsisian</i>	547
On the oscillations of the star with the phase transition <i>G. S. Blinovatyi-Kogan, Z. F. Seldov</i>	563
The magnetic stellar wind in the low mass close binary evolution <i>A. V. Tutukov</i>	573
The charge, magnetic dipole and the Lense-Thirring effect in generalized theory of gravity <i>G. H. Harutyunyan, V. V. Papoyan</i>	58
The statistical description of a radiation field on the bases of the invariance principle. II. The mean number of scatterings in the medium containing energy sources <i>A. G. Nikoghosian</i>	59
The processes of energy exchange between electrons and photons at intense radiation encountered in some astronomical objects. I. <i>G. T. Ter-Kazarian</i>	609
Ohmic dissipation and relaxation of the force-free magnetic fields <i>A. A. Solov'ev</i>	621
NOTES	
Spectral observations of low surface brightness galaxies in the M 81 group region <i>I. D. Karachentsev, V. E. Karachentseva</i>	641
REVIEWS	45
