

CONTENTS

Number 1

Polarimetric and photometric studies of BL Lac. Analysis of observational data. I. . . . V. A. Hagen-Thorn, S. G. Marchenko, V. A. Yacovleva	5
Photometric and polarimetric investigations of two BL Lac type objects S. G. Marchenko	15
The colours and Byurakan classification of galaxies . . . V. H. Malumian	25
Five-color photometry of the DQ Her (N Her 1934). I. E. S. Dmitrienko, Yu. S. Eftimov, N. M. Shakhovskoy	31
On the variability of the hydrogen and calcium emission in the spectra of SU Aur . . . V. P. Grinin, A. S. Mitskevich, L. V. Timoshenko	43
Spectral study irregular variables SV Cep. UX Ori and DD Ser L. V. Timoshenko	51
The thorium abundance in the atmospheres of Am-stars L. S. Lyubimkov, I. S. Savanov	63
An improvement of the MK classification using continuous spectra and the average energy distributions of O9-A0 stars . . . E. V. Ruban	75
Flare and H α in emission stars in the region of Orion nebula E. S. Parsamian	87
On the kinematics of Trapezium type multiple systems . G. N. Salukvadze	97
Physical parameters of visual binaries with computed orbits Z. T. Kratcheva, E. I. Popova, A. V. Tutukov, L. R. Yungelson	105
The model atmosphere for the bright component of the binary system ν Sgr V. V. Leushin, G. P. Topilskaya	121
On the relaxation times in the superfluid cores of neutron stars D. M. Sedrakian, K. M. Shahabassian, A. G. Movsessian	137
BVR-observations of polarimetric data of stars in reflection nebulae L. A. Pavlova, F. K. Rspaev	145
Low-excitation planetary nebulae L. N. Kondratyeva	153
The formation of filaments in the supernovae remnants . A. A. Rumyantsev	157
Study of carbon monoxide formation in interstellar clouds . L. N. Arshutkin	163
On asymptotic formulae of the theory of radiation transfer in a sphere and a spherical envelope A. K. Kolesov	177

On the mechanism of excitation of Alfen waves in cosmic plasma <i>R. G. Jangirtan, F. A. Kostanian</i>	189
Computation of the Franck-Condon factors for the series of astrophysically important molecular systems N_2 <i>N. E. Kuz'menko, V. B. Pavlov-Verevkin</i>	195

NOTES

Investigation of the galaxies from the Byurakan classification at a frequency of 102 MHz <i>V. S. Artyukh, M. A. Oganntsian</i>	211
--	-----

Number 2

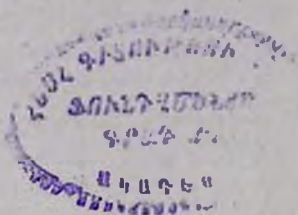

Spectra of galaxies with UV-continuum. V <i>B. E. Markarian, L. K. Erastova, V. A. Lipovetsky, J. A. Stepanian, A. I. Shapovalova</i>	215
On some new ultraviolet galaxies with jets <i>A. R. Petrossian, K. A. Sahakian, E. Ye. Khachikian</i>	229
Spectral observation of galaxy M 82 II <i>A. S. Amirkhantan, V. A. Hagen-Thorn, V. P. Reshetnikov</i>	239
The connection between the activity manifestations of the quasi-stellar object 3C 345 in optical and radio ranges <i>M. K. Babajants, E. T. Belokon', V. L. Gorochoy</i>	247
Similarity between the extended components of radio galaxies and plerion-type supernovae remnants <i>B. V. Komberg, M. A. Smirnov</i>	257
On the nature of variability of radiation from active galactic nuclei <i>V. G. Gorbatsky</i>	267
About a self-consistent model of rich cluster of galaxies. I. Galaxy component of cluster <i>M. V. Konukov</i>	273
Evolution of very early universe with polarized vacuum <i>V. G. Gurzadjan, A. A. Kochartan, S. G. Matinian</i>	287
The nonthermal radio emission of the galactic center <i>Ch. N. Seitnepesov, A. Kh. Khanberdiyev</i>	293
The hydrostatic models of gas in the clusters in unsteady state with respect to the irregular force-field <i>K. A. Sidorov</i>	303
New flare stars in the Mon I association <i>E. S. Parsamian, L. Rosino, O. S. Chavushian</i>	315
UBV-photometry of new H_α stars in association Orion OB 1d <i>K. G. Gasparian</i>	325
The dependence of the polarization degree of the light of cool supergiants on their I-K colour <i>R. A. Vardanian</i>	335
Non-LTE effects in the atmospheres of F-type supergiants. I. Over-ionization of Fe I atoms <i>A. A. Bogarchuk, L. S. Lyubimkov, N. A. Sakhibullin</i>	339

Photoionisation model emission and abundance of the T-Tauri nebula <i>V. V. Golovaty, B. S. Novosyadly</i>	357
A model of the object Geminga: degenerate dwarf rotating around black hole <i>G. S. Bisnovaty-Kogan</i>	369
Probability of photon scattering by electrons. A case of chaotically moving monoenergetic electrons . . . <i>H. A. Harutyunian, V. A. Djrbashian</i>	379
The standard problem of line formation in moving atmospheres . <i>V. M. Serbin</i>	387
Statistical simulation of Oosterhoff effect . . <i>A. M. Ejgenson, O. S. Yatsyk</i>	411
NOTES	
The H α -emission line stars in the region of the Khavtasi 193 dark nebula <i>M. Tsvetkov, Ye. Semkov</i>	421
New nebulous objects <i>V. M. Petrossian</i>	423
New Trapezium type systems in Taurus dark clouds (TDC) . <i>A. S. Khodjaev</i>	425

Number 3

Spectrophotometry and morphology of the galaxies with UV excess. VI <i>M. A. Kazartan, E. S. Kazartan</i>	431
A spectrophotometric investigation of a superassociation in the galaxy NGC 2820 A <i>N. K. Andreassian, E. Ye. Khachikyan</i>	441
On the separation of components of radiation of variable extragalactic sources <i>V. A. Hagen-Thorn</i>	449
The galactic rotation curve from OH survey . <i>I. G. Kolesnik, L. V. Yurevitch</i>	461
About a self-consistently model rich cluster of galaxies. II. Plasma component of cluster <i>M. V. Konukov</i>	473
Spiral solitons in the flat gaseous disks of galaxies . . <i>M. A. Abramtan</i>	487
The 2 Mon star formation region. The cluster region NGC 2244 <i>N. G. Guseva</i>	505
On the spectral classification of faint stars <i>G. A. Gurzadyan</i>	515
The energy spectrum of flares of the UV Cet-type stars and physical meaning of several statistical characteristics of these stars . . <i>R. E. Gershberg</i>	531
On dependence of the magnetic field of chemically peculiar stars on the rotation period <i>Yu. V. Glagolevski</i>	545
The lines of carbon, nitrogen and oxygen in the spectra of planetary nebulae. I. The transition probabilities and oscillator forces <i>P. O. Bogdanovitch, R. A. Lukoshyavichus, A. A. Nikitin, Z. B. Rudzikas, A. F. Kholtygin</i>	551
On the problem of the shape of expanding supershells of neutral hydrogen <i>S. A. Silich</i>	563

The radiation field in media with radial symmetry	<i>A. K. Kolesov</i>	571
On possibilities of pulsar plasma oscillations in the closed lines of the force region of the magnetosphere	<i>M. A. Mamedov</i>	585
On the problem of noncoherent scattering in one-dimensional media	<i>M. S. Gevorgian, A. Kh. Khachatryan</i>	599
The thermodynamic proof of Rosseland's theorem	<i>A. M. Sobolev, V. S. Strelnitsky, N. N. Chugai</i>	613
NOTES		
On the problem of duplicity of flare stars	<i>E. S. Parsamian</i>	633
The chain of three H ₂ -stars in Vulpecula	<i>V. M. Petrossian</i>	635
