

CONTENTS

Number 1

Photometry of the Perseus cluster of galaxies A426 <i>A. G. Eghikian, A. T. Kalloghlian, G. Richter, W. Thänert</i>	5
Radial velocities of isolated galaxies <i>I. D. Karachentsev, V. E. Karachentseva</i>	19
Observations of the galaxies with ultraviolet continuum at 102 MHz. II. <i>V. S. Artyukh, R. A. Kandalian, M. A. Hovhannissian, V. A. Sanamian</i>	27
On the angular momentum of galaxies <i>M. G. Abrahamian, D. M. Sedrakian</i>	35
On the relative orientations of magnetic fields and major axes of radiogalaxies <i>R. R. Andreassian</i>	47
Primary gamma-ray emission with energy 10^{14} — 10^{16} eV and possible sources of cosmic rays in the galaxy <i>F. A. Aharonian, E. A. Mamldjantian, S. I. Nikolsky, E. I. Tuktsh</i>	55
Two models of flat stellar systems without a symmetry plane <i>B. P. Kondrat'gev</i>	69
The generalized virial theorem for a system of fluctuating composition <i>T. B. Omarov</i>	77
Nonlinear density waves in a marginally stable gravitating disk <i>V. I. Korchagin</i>	91
The spectrophotometry of carbon stars. I. <i>R. Ch. Hovhannissian, S. E. Nersessian, M. Sh. Karapettian</i>	99
Determination of the interstellar component of the linear light polarization of red supergiants <i>H. V. Abrahamian</i>	111
On the behaviour of photosphere of supernovae <i>O. S. Bartunov, D. Yu. Tsustkov</i>	121
On the properties of the local interstellar medium . . . <i>Al. A. Suchkov</i>	133
Nonlinear transfer problem in case of general laws of frequency redistribution <i>N. B. Yengibartian, A. Kh. Khachatryan</i>	145
On the asymptotic formulae of interval radiation fields in plane parallel media and their application to calculation of average durations of the layer and spherical shell luminosity . . . <i>N. N. Rogovtsov, A. M. Samson</i>	163
Stationary axial-symmetric gravitational fields in the bimetric theory <i>H. A. Grigorian, E. V. Chubartian</i>	177

Gasodynamical effects of cosmic strings <i>V. A. Gastlov, V. I. Maslyankin, M. Yu. Khlopov</i>	191
---	-----

NOTES

New H α -emission line stars in the region of the Taurus dark clouds <i>E. S. Parsamian, A. S. Hojaev</i>	203
On the problem of noncoherent scattering <i>A. Kh. Khachatryan</i>	206

Number 2

Radial velocities of galaxies in the vicinity of groups of galaxies <i>J. Vennik, A. Kaazik</i>	213
Observations of the radio galaxies with low luminosity of 102 MHz <i>R. A. Kandalian, M. A. Hovhannissian, V. A. Sanamian</i>	221
On the question of X-ray emission of elliptical galaxies and the determination of their masses <i>V. A. Krol'</i>	227
The generation of wave pattern in galactic disk by an orbiting retrograde companion <i>V. I. Korchagin, N. A. Prokhorov</i>	237
The spectrophotometry of carbon stars. II. <i>R. Ch. Hovhannissian, S. E. Nersessian</i>	245
On the light changes of the antflare star V346 Ori . . . <i>G. U. Kovalchuk</i>	255
The distance to the galactic centre on the rotation curve . . . <i>L. V. Yarevich</i>	265
The spatial structure of novae DQ Her and HR Del shells . . . <i>L. S. Pilgugin</i>	277
On the nature of expanding HI supershells and the spectrum of stellar masses of OB associations <i>S. A. Silich</i>	289
On the radial systems of dark globules <i>A. L. Ggulbudaghtian</i>	295
On the polarization of the quasar light . . . <i>V. M. Loskutov, V. V. Sobolev</i>	307
Asymptotic scaling in the problems of resonance radiation transfer in linearly expanding media. I. Kernels of integral equations, photon escape probabilities <i>S. I. Grachev</i>	323
Light scattering in multi-layer atmospheres. I. The diffuse reflection problem <i>J. M. Dlugach, E. G. Yanovitsky</i>	337
On the solution of nonlinear problem of noncoherent anizotropic scattering <i>A. Kh. Khachatryan</i>	349
Energetics of galactic fountain <i>I. G. Kovalenko, Yu. A. Shchektinov</i>	363
Radiation reflection from an inhomogeneous atmosphere for general laws of noncoherent scattering <i>H. A. Harutyunian</i>	373
Gravitation and vacuum field <i>R. V. Tevikian</i>	385
Dynamics of the twisted magnetic loops <i>A. A. Solov'ev</i>	393

Conditions of equilibrium for a perfect fluid in parametrized post-Newtonian formalism	<i>N. P. Bondarenko</i>	409
The possible checking of various models of pulsars	<i>I. F. Malov</i>	419
The lines of carbon, nitrogen and oxygen in spectra of planetary nebulae. II. Intensities of the recombination lines C II and N III ions and abundancy of C III and N IV ions <i>P. O. Bogdanovitch, A. A. Nikitin, Z. B. Rudzikas, A. F. Kholtygin</i>		427

NOTES

A note on the circumstellar dust around V1057 Cyg	<i>G. Welin</i>	437
---	-----------------	-----

Number 3

The second Byurakan spectral sky survey. IV. The field $\alpha=12^h22^m$, $\delta=+55^\circ00'$ <u><i>B. E. Markarian</i></u> , <i>J. A. Stepantan, L. K. Erastova</i>		439
Two-dimensional photometry of circumnuclear region in Seyfert galaxy NGC 1275 <i>L. P. Metik, I. I. Pronik</i>		451
Optical manifestation of superluminal motion in the quasar 3C 345 <i>M. K. Babadzhanians, E. T. Belokon'</i>		459
The results of the surface brightness determination of the Milky Way in the V system	<i>Ya. M. Zavarzin</i>	473
The formation of spectrum of superhigh energy electrons in galaxy <i>F. A. Aharonian, A. S. Ambartsumian</i>		479
On the irrotational and the zero angular momentum ellipsoids in the Dirichlet problem	<i>B. P. Kondrat'ev</i>	487
Angular distribution and polarization of X-ray bursters radiation <i>I. I. Lapidus, R. A. Sungaev, L. G. Titarchuk</i>		503
The polarization of star radiation in Mon R1 association <i>L. A. Pavlova, F. K. Rspaev</i>		521
Spectrophotometric observations of V1016 in 1980—1985 <i>A. P. Ipatov, B. F. Yudin</i>		527
The multicomponent structure of P Cygni spectral lines <i>N. Markova, I. Kolka</i>		539
Asymptotic scaling in the problems of resonance radiation transfer in linearly expanding media. II. Solutions for infinite and semi-infinite media <i>S. I. Grachev</i>		551
On a nonlinear problem of noncoherent scattering in a one-dimensional medium <i>A. Kh. Khachatryan, A. A. Hakopian</i>		569
The method of calculation of radiation fields in spectral lines	<i>V. M. Serbin</i>	583

The equation of motion and the equilibrium conditions for ideal rotating liquid in parametrized post-Newtonian magnetohydrodynamics	<i>N. P. Bondarenko</i>	595
Explosive helium burning. I. The kinetics of burning at constant temperature and density	<i>A. N. Khoklov, E. V. Ergma</i>	605
The evolution of the hot Universe with massive unstable leptons	<i>B. V. Vainner, Yu. A. Shchekinov, M. B. Ente</i>	621
