MS № 1467 OF ARABIC SCRIPT MANUSCRIPTS COLLECTION OF THE MATENADARAN AS A NEWFOUND EXAMPLE OF THE "COLLECTION OF VERSE DICTIONARIES"*1

Ani Avetisyan

Abstract

The present article touches upon a series of Ottoman Turkish manuscripts from the Matenadaran's Arabic script manuscripts collection, an example of a unique collection in Ottoman Turkish manuscripts known as the "Collection of Verse Dictionaries" MS **No. 1467**, in order to provide the first detailed study.

These collections were compiled at the religious-educational institutions called tekke or dergāh, and the medrese. They were compiled as language textbooks, in order to provide easy learning of languages (Arabic, Persian, Ottoman Turkish) through the simultaneous use of several verse dictionaries and to be engaged in the process of learning languages by heart.

The unique copy of the Matenadaran's "Collection of Verse Dictionaries" includes 3 complete copies of bilingual (Arabic-Ottoman Turkish) and trilingual (Arabic-Persian-Ottoman Turkish) verse dictionaries of the 14th-15th, 17th and 19th-century writers: copies of Ferişteoğlu 'Abdullaţīf ibn Melek's (proper name was 'Abdullaţīf 'İzzeddīn et-Tirevī) "Luġat-i Ferişteoġlū" and Bosnalı Ebū' l-Fāżl Muḥammed (Meḥmed) ibn Aḥmed er-Rūmī's "Ṣubha-i Ṣıbyān" Arabic-Ottoman Turkish and also complete copy of Adanalı Ḥōca Meḥmed Ḥayret's (propar name was Meḥmed Behāeddīn Ḥayret) "Tuḥfe-i Zībā" (known with another titles as "Tuḥfe-i Dürrī" or "Tuḥfe-i Ḥayret" or "Tuḥfe-i Se Zebān") Arabic-Persian-Ottoman Turkish verse dictionaries.

The article presents in detail the works included in the collection. At the same time, it has touched upon the methodology of writing verse dictionaries in classical Turkish literature, their structural features, the significance and role of dictionaries in Turkish society, religion, literature and education. The purposes of writing verse dictionaries in all cases were to teach languages, to develop and spread literary speech, and to practice in prosody (especially in 'Arūż meter).

The comprehensive presentation of the collection is even sufficient for it to become a part of the manuscripts of the four collections, already known in foreign collections as the "Collection of Verse Dictionaries", in order to become a source of new research opportunities for local and foreign specialists.

Keywords: The collection of Arabic script manuscripts, Matenadaran, Ottoman Turkish manuscripts, Dictionary, Verse dictionary, Collection of Verse Dictionaries, Tuhfe, Lüğat-i Ferişteoğlu, Sübha-i Sıbyân, Tuhfe-i Zibâ.

^{*} The article was submitted on April 2, 2022. The article was reviewed on April 16, 2022.

¹ This is only a small part of our study; the upcoming book includes 30 manuscripts of bilingual and trilingual dictionaries of the Arabic script manuscripts collection of the Matenadaran.

Introduction

In the Ottoman Turkish manuscripts, which are part of the Arabic script manuscripts collection of the Matenadaran, there are many "Collections" ($Mecm\bar{u}'a$), which are separate sources of study both in structure and in the variety of material covered.

Initially, in classical Turkish literature, notebooks (*defter*) made up of various works, fragmentary quotations recorded from works, up to everyday issues (current calculations, bills, etc.) related to instructions were perceived as a collection [12: 8].

Later, these notebooks were replaced by the currently perceived "Collections", which were compiled by both masters and students during the workshops on a regular and mixed basis with irregular principles. Also, there are samples implemented by one hand.

The collections are valuable resources for outlining the temporal heritage of literature, history and culture. They are especially important in terms of revealing unknown works, even the names of new poets, writers, historians, unpublished works of famous writers, and even the prototypes of printed works.

Referring to the collections and the circumstances of their writing, Turkish researcher Atabey Kılıç notes that there are already some attempts to classify the collections, and points out that the Turkish researcher Güney Kut singled out several types of "Collections" and classified them theoretically:

- a. "Similar Collections" ("Nażīre Mecmū'aları"), which include works of the same content.
- b. "Collection of Poems" or "Collection of $D\bar{v}a\bar{n}$ s" ("Mecmū'a-i Eş'ar" or "Mecmū'a-i Devavin"),
- c. "Collections of works related to the same issue" (e.g., "Collection of Medicine Works" ("Mecmū'a-i Edviye"), "Collection of History Works" ("Mecmū'a-i Tevāriḥ"), "Collection of Letters" ("Mecmū'a-i Münṣe'āt"), etc.),
- d. "Mixed Collections" ("Karışık Mecmū'aları"), which include verse and prose works of various contents, often in different (e.g., Arabic, Persian, Turkish) languages,
- e. "Collections compiled for famous people" (e.g., sponsor of the writer or scribe, ruler of the period, owner of collection etc.) [12:8-9].

Attempts at classification of collections should be considered conditional, as the studies are ongoing and many collections with new patterns may emerge.

The "Dictionary Collections" ("Mecmū'a-i Luġat", "Cāmī'ü'l-Luġat", "Luġat Mecmū'ası", "Sözlük Mecmū'ası") are also a separate category in the collections, which as the title states, include dictionary examples and are intended for teaching languages in schools. An example of such a collection is mentioned in MS No. 210

of the Library of the Turkish Linguistic Society, which includes 9 dictionaries related to Persian².

In the history of the Turkish codicology, the collections, which are known as the "Collection of Verse Dictionaries" ("Manzūm Sözlük Mecmū'ası") are also mentioned. Usually, more than one verse dictionary is included in them.

So far, four copies of the "Collection of Verse Dictionaries" are known, i.e., the Library of the Mevlānā Museum MS No. 4026 (Mevlânâ Müzesi Kütüphanesi 4026 No'lu Mecmua)³, the Library of Süleymaniye in Istanbul, Collection after the name of Reşid Efendi MS No 977 (Süleymaniye Kütüphanesi, Reşid Efendi No. 977)⁴ and also MS No 876 at the same library (Süleymaniye Kütüphanesi, No. 876)⁵ and the last one is the National Library's MS No 2727 (Milli Kütüphane No. 2727)⁶. A number of articles have been published about these collections in various scientific journals.

These collections were compiled mainly at the religious-educational institutions called *tekke* or $derg\bar{a}h^7$, and the $medrese^8$ [12:7].

In fact, they were essentially compiled as language-textbooks, with the purpose to provide ease of learning languages (Arabic, Persian, Ottoman Turkish) with the simultaneous use of several verse dictionaries and to be involved in the process of learning languages through memorizing (*ezberci egitim* - learning by heart).

A new example of such a "Collection" is MS No. 1467, which we find out in the Arabic script manuscripts collection of the Matenadaran. Our collection

² The dictionaries are "Luġat-i Müşkilāt-i Şāhnāme", "Risāle fī Beyānī Ma'na'l-Çalab", "Luġat-i Fārisī", "Şihāh-i Acemiyye", "Tuḥfet ül-Hādā" ("Luġat-i Dānistan"), "Luġat-i 'Arabī", "Luġat-i Gülistān", "Luġat-i Bostān", "Luġat-i Bahāristān". See in detail [2].

³ 3 verse dictionaries are included: Sunbulzāde Vehbī "Tuḥfe-i Vehbī", Muġlalī İbrāhīm Şāhidī Dede "Tuḥfe-i Şāhidī", Meḥmed ibn Aḥmed er-Rūmī "Şubḥa-i Şıbyān". See in detail [8], [12].

⁴ 8 verse dictionaries are included: Ḥusām ibn Ḥasan el-Ķonevī "Tuḥfe-i Ḥusām" (or "Tuḥfe-i Ḥusāmī"), Muġlalī İbrāhīm Ṣāhidī Dede "Tuḥfe-i Ṣāhidī", Lāmī Çelebī "Tuḥfet ül-Lāmī", ʿOsmān ibn Ḥuseyin el-Bosnevī "Luġat-i Manzūme", ʿAlī "Nazm ül-Esāmī", Lutfullāh Ḥalīmī ibn Ebī Yūsuf "Luġat-i Halīmī", Lutfullāh (Leʾālī) "Tuḥfe-i Mukaddimet ül-Luġat", Behāʾuddīn ibn-i ʿAbdurraḥmān el-Malkaravī "Uʿcūbet ül-Ġarāʾib". See in detail [13].

⁵ 9 verse dictionaries are included: Şemsī "Cevāhir ül-Kelimāt", Luṭfullāh Ḥalīmī ibn Ebī Yūsuf "Baḥr ül-Ġarāʾib" (2 copies), ʿAlī "Naẓm ül-Esāmī", Muġlalī İbrāhīm Ṣāhidī Dede "Tuḥfe-i Ṣāhidī", Ḥusām ibn Ḥasan el-Ķonevī "Tuḥfe-i Ḥusāmī", [Kalender] "Luġat ibn Kalender", Bedrūddīn Ebū Naṣr Mesʾūd ibn Ebū Bekr el-Ferāhī "Niṣāb us-Ṣibyān" (2 copies). See [6:3].

⁶ 3 verse dictionaries are included: Meḥmed ibn Aḥmed er-Rūmī "Ṣubḥa-i Ṣibyān", Muġlalī İbrāhīm Ṣāhidī Dede "Tuḥfe-i Ṣāhidī", Sunbulzāde Vehbī "Tuḥfe-i Vehbī". See reference to this [1].

The *sufī* spiritual center (monastic complex), formerly a home for *dervī*; es, was later transformed into an institution, which included a mosque, a meeting place, a school, a library, a guest house, a hospital, a charitable center, and more.

⁸The founding of the *medrese* is connected with the Seljuk leader Turgut Bey (1040, Niṣapur), whose traditions continued during the Ottoman period (under Sultan Meḥmed II (1432-1481)) and lasted until the end of the 19th century, with some changes in the curriculum. In fact, education in the *medreses* were primarily based on Islamic religion, culture, law, religious ideas, beliefs, and then included language, literature, grammar, etiquette, rhetoric, arithmetic, history, geography, medicine, translation and other subjects.

contains three verse bilingual (Arabic-Ottoman Turkish) and trilingual (Arabic-Persian-Ottoman Turkish) dictionaries copied in the 19th or mid-19th century. Before discussing the content of the collection, we should first understand what verse dictionaries are, what their structure is and for what purpose they were created.

The writing methodology of verse dictionaries

Verse dictionaries and works in Islamic literature were first compiled in Arabic and Persian literature, then in classical Turkish literature in more extensive and valuable examples [5:7]. The works of Turkish authors have become guidelines for the development of Turkish lexicography.

The first example of a bilingual (Arabic-Persian) verse dictionary in Islamic literature belongs to Bedrūddīn Ebū Naṣr Mes'ūd ibn Ebū Bekr el-Ferāhī (d. 640 / 1242-1243) entitled "Nisāb us-Sıbyān" written in AH 618 / 1220-1221AD which has become an Arabic-Persian textbook-dictionary in Iran, Central Asia, as well as in India [10:67].

A tradition of writing verse dictionaries was especially prominent in classical Turkish literature and classified into three groups: Persian-Ottoman Turkish, Arabic-Ottoman Turkish, Arabic-Persian-Ottoman Turkish [10:66].

About 82 verse dictionaries from which 28 Persian-Ottoman Turkish, 20 Arabic-Ottoman Turkish, 17 Arabic-Persian-Ottoman Turkish, 1 Ottoman Turkish-Armenian, 1 Ottoman Turkish-Bosnian, 8 Ottoman Turkish-Greek, 1 Ottoman Turkish-Bulgarian, 1 Ottoman Turkish-Arabian-Persian-Afghan (Pashto)-Hindi, 3 Ottoman Turkish-Albanian, 1 Ottoman Turkish-French, 1 Ottoman Turkish-German verse dictionaries have been written in the territory of the Ottoman Empire.

The first Persian-Ottoman Turkish verse dictionary in Turkish-literature belongs to Konyālı Ḥusām ibn Ḥasan (Ḥusām ibn Ḥasan el-Konevī) titled as "Tuḥfe-i Ḥusām" or "Tuḥfe-i Ḥusāmī" which was written in AH 802/1399-1400 AD⁹, and the last one is Aḥmed Remzī Akyurek's "Tuḥfe-i Remzī" written in AH 1343/1924 AD¹⁰, which is the last verse dictionary written in the Ottoman Turkish period.

The first Arabic-Ottoman Turkish verse dictionary was written by Ferişteoğlu 'Abdullaţīf ibn Melek in AH 795/1392 AD and called "Luġat-i Ferişteoġlū". The

⁹ The full title of the dictionary is "Tuḥfe-i Husāmī ez-Mūeltekāt Sāmī". It was written with a resemblance to the Arabic-Persian dictionary entitled "Nasīb ül-Fıtyān" or "Nesîb üt-Tıbyân" written by Hüsāmeddīn Ḥasan bin 'Abdülmü'min el-Hoyī. It consists of 20 kutas (300 beyts) and 5-beyt ḥatime (epilogue), a total of 305 beyts. There are given 1350 Persian words equivalents in Ottoman Turkish provided. See [15:111-113].

The author gave as the second title "Uşküfe" ("Flower" or "Bud") both in the preface and epilogue of the dictionary. It begins with prose and 37 *beyt*-verse prefaces, and ends with 18 *beyt*-epilogue. The dictionary section consists of 29 *kutas* (261 *beyts*), includes 1250 Persian words with the repetitions of lexical items. **See** [15: 427-430].

last Arabic-Ottoman Turkish verse dictionary belongs to Yahyā Efendi (or Efendi Yahyā) entitled "Luġat-i Yūsuf" written in AH 1241/1826 AD¹¹.

The first trilingual (Arabic-Persian-Ottoman Turkish) verse dictionary was compiled by Behā'uddin ibn 'Abdūrrahmān Malkaravī in AH 827/1424 AD and entitled "'U'cubet ül-Ġarā'ib fi Nazm ül-Cevāhir ül-'Acā'ib"12. The latest one is Süleymān Hayri's "Hayr ül-Lugat" dictionary written before 1891 AD¹³.

The most valuable example of the verse bilingual dictionaries is 15th-16thcentury Turkish poet Muġlalī Ibrāhīm Sāhidī Dede's (Sāhidī, Mevlānā Sāhidī)¹⁴ Persian-Ottoman Turkish dictionary entitled "Tuhfe-i Şāhidī" which was written as a nazīre16 to Husām's "Tuhfe-i Husāmī" in AH 920 /1514-1515 AD or AH 921/1515-1516 AD. It is the most copied dictionary. Only in Ankara National Library (Ankara Milli Kütüphane) there are more than 40 manuscripts of the dictionary [15:208]. The work was published five times between 1848-1867 AD [10:67].

Another famous example is the 18th-19th-century Turkish poet Sunbulzāde Vehbī's 17 "Tuhfe-i Vehbī" Persian-Ottoman Turkish verse dictionary. 18 It was written as an imitation of Sāhidī's work in AH 1196 /1781-1782 AD. The vocabulary was copied in large numbers and published about 60 times [10:67].

In particular, the verse dictionaries were widespread in Turkish as well as Turkish-speaking society until the middle of the 19th century. They were used as textbooks in pre-schools, known as sibvān mektebī, mekātib-i ibtidā'i, ilk mektep, popularly known as mahalle mektebī, tās mektep and by other names¹⁹, and later also in *medreses*, which were large in volume and presumably already in a large number of words [7:119-120].

¹¹ It is a small dictionary, consisting of 6 pages, a total of 114 beyts. The author dedicated it to his son Yūsuf. See in detail [4].

¹² The dictionary is especially known by the short title "'U'cubet ül-Garā'īb". It consists of a preface, 36 kitas, a total of 400-436 bevts. See [10:68], [5:15-16].

¹³ It consists of 3000 *beyts*. See [15:410].

¹⁴ He was the author of *Dīvāns* and *Mesnevīs*. Sāhidī was born in AH 875/1470-1471 AD in Muġla, province of Menteşe. He entered like his father the order of Mevlevīs and became a Şeyh of the *Mevlevīs Order*. He died in AH 957/1550 AD. See [21:139b].

¹⁵ It contains a prologue in *mesnevī* verse, 27 ktás and an epilogue with *ebced* (chronogram).

¹⁶ A poem written in imitation of one another poet's poem.

¹⁷ His proper name was Muhammed ibn Resīd (or Rāsīd). He was born in Marās. After completing his studies in his native town, he settled during the reign of Mustafa III (1757-1774 AD) in Constantinople and obtained employment as secretary to Yenişehirli 'Osmān Efendi and the Re'īs ul-Kuttab (head clerk) Ismā'īl Beg. Vehbī died at Constantinople in AH 1224/1809-1810 AD. See [21:144], [19:242].

¹⁸ It contains a prologue in *mesnevī* verse, 57 ktúas and a *mesnevī* titled "Istilāhāt-i 'Acem" ("The Idiomatic Expressions of Persian"), short epilogue with *ebced* (chronogram).

¹⁹ Schools of the same name were first opened in Iznik, Bursa, Edirne, and later in Istanbul. 5 (sometimes referred to as school-age 4) -10-year-old boys and girls studied in those schools. They were taught Persian, Arabic, Turkish, recitation of the *Qur'ān*, etiquette, Islamic law (fikh), history, grammar, arithmetic, and literature, and got especially acquainted with Iranian literature through Rūmī's "Masnavī", Sa'dī's "Golestān" and "Bostān", Firdawsī's "Sahnāme".

The primary purpose of verse dictionaries was to introduce students to foreign languages - Persian, Arabic, as well as Ottoman Turkish (*elsine-i ṣelāṣe*), to facilitate language learning, develop and spread literary speech and practice in prosody (especially in 'Arūz' meter).

For studying Persian and Arabic, verse dictionaries such as Şāhidī's "Tuḥfe-i Ṣāhidī" and Vehbī's "Tuḥfe-i Vehbī" and "Nuḥbe-i Vehbī", Ferişteoġlu's "Luġat-i Ferişteoġlū" and Muḥammed (Meḥmed) ibn Aḥmed er-Rūmī's "Ṣubha-i Sıbyān" were often included in the curriculum.

Verse dictionaries have been valued for their choice of vocabulary, especially with the intention to facilitate the comprehension of the $Qur\ \bar{a}n$ ($Kur\ \bar{a}n$ - $i\ Ker\bar{t}m$) and Hadith ($Had\bar{i}s$), as dictionaries significantly contain incomprehensible words ($gar\bar{i}b$) of them, and in classical Islamic literature the dictionaries were evaluated by the intricate vocabulary of the $Qur\ \bar{a}n$ and in particular, by the 13th-century Persian sufi poet Mevlānā Cellāleddīn-i Rūmī's poem "Mesnevī".

Adjacent to these lexicons, dictionaries also include the everyday vocabulary of the vernacular of the time, Persian or Arabic words and idiomatic expressions $(i \not\equiv t, l \bar{a} \bar{h} \bar{a} t)$ that are currently obsolete (arkaik, eskicil) or preserved as synonyms in oral and literary speech. In some cases, the dictionaries also include the grammatical rules of the primary language with comments, linguistic, metrical and literary information, as well as religious sections.

Verse dictionaries were also evaluated as literary works. Bilingual and trilingual verse dictionaries were composed not only of simple word combinations, but there were also works created in two or three languages (like a *mülemma* 'poem) which developed artistic thought and interesting readability works, which enriched the languages with vocabulary and linguistic-structural means of expressions. In this case, the rich linguistic culture of the Persian and as well as the Arabic languages with the religious and fictional lexicon flowed into the Turkish language, automatically helping to form Ottoman Turkish as the official literary language of the Ottoman Empire [3:161].

In particular, the verse dictionaries are known by such titles as "Niṣāb" ("Generation", "Beginning")²⁰, "Tuḥfe" ("Gift")²¹, "Naẓm" ("Composition"), "Manẓūme" ("Verse", "Poem"), "Luġat" ("Dictionary") [14:151].

The verse dictionaries generally start with the preface written in *mesnevī*²² poetic form where the author of the work glorifies God, prays for successful implementation of the work, then include a chapter explaining the purpose of writing the book (*Sebeb-i telīf*). The main portion of the dictionary consists of "Ķīṭa"s or

²⁰ It was used by Ferāḥ (or Farāḥ) who was the author of the first bilingual (Arabic-Persian) verse dictionary titled "Nisāb us-Sıbyān". **See** [14:151].

²¹ The title "Tuḥfe" was firstly used by Ḥusām (Ḥūsām) who was the author of the first bilingual (Persian-Ottoman Turkish) verse dictionary called "Tuḥfe-i Ḥūsāmī" or "Tuḥfe-i Ḥūsām". **See** [5:9].

²² The poetical form with $Ar\bar{u}\dot{z}$ meter that is used in Iranian, Arabic and Ottoman Turkish literature.

"Baḥir"s²³ arranged in alphabetical order with different versification and an epilogue ($\hbar atime$) written again in $mesnev\bar{\imath}$ or only in other short verse-forms, where the author prays to God for the successful completion of the work, gives again the title of the work and author's name, at the end of which there is often a beyt representing a chronogram (in ebced form) where the year of dictionary's composition is stated by $misr\bar{a}$ (hemistiche) or by a phrase or word written in $misr\bar{a}$. In some of the vocabularies after the epilogue include lists with the numerical value of letters (hesab-iebced) from elif to gayn (1-9 (hesab-iebced) hesab-iebced) from elif to hesab-iebced) from elif to hesab-iebced0 from elif to hesab-iebced1.

The $k_1t_0^2$ s can be written both in $me\underline{s}nev\overline{\iota}$ and $na\underline{z}m^{24}$, $m\ddot{u}stez\bar{a}d^{25}$, $terk\bar{\iota}b-i$ bend²⁶ and other verse-forms [14:151].

The titles of the kitas are in Persian or Arabic depending on the languages of the dictionary. The first part of the titles usually mentions the letters of the alphabet at the end of the poetic lines indicating the sequence of the kitas (Kita-i elif, Kita-i bā, etc.) or the following numbers (Kita-i evvel, Kita-i sānī, etc.), and in the second part the baḥir (meter)²7 of the kita is given (Baḥr-i Hezec, Baḥr-i Kāmil, Baḥr-iRecez, Baḥr-i Remel, etc.) (e.g. אווי שליים של

Each kitá ends with taktī beyt (metrical couplet)²⁹ where the kitá 's vezin (mnemonic words of the meter) and baḥir (meter) are given. In some dictionaries the taktī beyt was given both at the beginning and the end which are already perceived as additional metrical couplets, can refer to the same kitá or the next one, and even sometimes entitled "el-Multeḥaķ" ("Added") or "Ķitá". This part has

²⁴ It is a form of descriptive poetry that has the same structure as *ktta* and *rubā i*.

²³ In this case, the *Kita* and *Bahir* are used in the sense of *part* or *section*.

²⁵ It is one of the poetic forms of classical literature, a poem consisting of long and short lines of poetry.

²⁶ A poem consisting of three or more *bends* (couplets). Each *bend* consists of 6-10 *beyts* and is called *terci* '-*hāne*, after which the next *bend* is repeated.

²⁷ The basic *baḥir*s of the Arabic poetry which are used in classical-Turkish-literature are 16: *Tavīl*, *Mezīd*, *Basīt*, *Kāmil*, *Vāfīr*, *Hezec*, *Recez*. *Remel*, *Serī*, *Hafīf*, *Münseriḥ*, *Muzārī*', *Muktedab*, *Muctess*, *Mütekārib*, *Mütedarik*. The three *Cedīd*, *Mūṣākil*, *Karīb baḥir*s ("Buḥur-i Muḥatessa") are used only in Persian-literature and never used in Ottoman Turkish-literature. See [1:186-191].

²⁸ Vezin consists of 8 cūz or tefl īle,e.g. مفتع لن مواعلية على على على على على على على المناطقة المن

been added especially in subsequent copies of the dictionaries that were missing in the original and earlier copies.

The numbers of kitas (or baḥirs) are different. The bilingual verse dictionaries include 10-81 kitas and 11-100 kitas are in the verse trilingual dictionaries [16:433]. According to this the number of beyts are also different: about 100-1300, total 500-5,000 words [14:151-152].

The only exceptions are Nazīm's (Nezīm Frakulla) "Der Beyān-i Turkī Ma'a Lisān-i Arnabūd" Ottoman Turkish-Albanian verse dictionary consisting of 10 beyts (totally 60 words), Refî'ī Kalayī's "Manzūm Luġāt-i Ermeniye" Armenian-Ottoman Turkish dictionary consisting of 79 beyts. The last one is Luṭfullāh's (known by the name Leʾālī) "Tuḥfe-i Muḥaddimet ül-Luġāt" Persian-Ottoman Turkish dictionary consisting of 4 kuṭas (84 beyts) and including 250 words.

In one $miṣr\bar{a}$ 'the definitions of three, sometimes four or five words are given. For the exact pronunciation of the words (also for studying) hareke or haraka (vocalization) were given, which are often separated by red ink especially in handwritten examples of the dictionaries. Even Eastern Arabic numerals are indicated at the top or bottom of word units for easy search of bilingual or trilingual pairs from 1 to 9 ((\(\frac{1}{2}\))) also from 1 to 10 (\(\frac{1}{2}\)) or from 1 to 12 (\(\frac{1}{2}\)) and etc.

In conclusion, the authors of dictionaries have always spoken about the importance, practicality, simplicity and the role of verse dictionaries in language-learning, eventually hoping that their dictionaries would become an important source of imitation and will be included in the learning process like their predecessors.

MS No. 1467 of the Arabic script manuscripts collection of the Matenadaran

MS No. 1467 is a newfound example of the "Collection of Verse Dictionaries" in the Arabic script manuscripts collection of the Matenadaran. It consists of 78 folios, where 1a, 10a, 28a-9a folios are blank, the paper is Western, written area is 14x19.5 cm, the text panel is arranged in two columns and one column (ff. 34b-44a), set within a complex red frame (9.5x15 cm.), between 8-15 lines to the page are written in *nesiħ* script, catchwords are at the left bottom of each verso page, the entire text is in black, subtitles, the numbers and letters at the bottom of words are in red, the binding is of marbled paper (red, white, brown) with a cover spine of brown artificial leather, board of cardboard, and a doublure of paper. The list of the works is written on doublure A^{b30}. The manuscript is in satisfactory condition. The

³⁰ Doublure A^b: The list of works:

binding paper and the artificial leather spine are worn out, the folios are newly stitched, and the quire is broken.

The collection³¹ also includes 3 bilingual and trilingual verse dictionaries, two of which are Arabic-Ottoman Turkish verse dictionaries: the first one known as the "Ṣubha-i Ṣibyān" written by the 17th-century poet Bosnalı Ebū' l-Fāżl Muḥammed (Meḥmed) ibn Aḥmed er-Rūmī, the "Luġat-i Ferişteoġlū", written by the 14th-15th-century writer Ferişteoġlu 'Abdullaṭīf ibn Melek, and the Arabic-Persian-Ottoman Turkish verse dictionary known as the "Tuḥfe-i Zībā" written by the 19th-century poet-translator Adanalı Ḥōca Meḥmed Ḥayret.

On folios 10b-27b of the collection is the complete copy of the Arabic-Ottoman Turkish verse dictionary "Ṣubha-i Ṣibyān" (كُلْتُ عَلَيْكُ The Children's Bead) [23:f.10b]³². The dictionary consists of a prologue, 31 kuta and 16 bahir (47 in total) and an epilogue. The text panel is arranged in two columns and the number of lines is 15.

From the epilogue לֶּבֶׁי , "Ḥātime"), which is also the scribal colophon, we find that the copy was compiled in AH 1258 on 2 *Receb*/on August 9, 1842 AD, without mentioning the name of the scribe [23:f.27b]³³.

In the prologue of the work the author highlights the importance of his dictionary, noting that it is as relevant as Ibn Ferişte's dictionary (meaning the first Arabic-Ottoman Turkish dictionary - A.A) and like it contains words taken from the $Our'\bar{a}n$ [23:f.11b]³⁴.

Unlike authors of similar dictionaries, Meḥmed ibn Aḥmed er-Rūmī does not say anything about himself in the preface. Researchers found out the name of the author of the dictionary from printed copies or commentaries (*şerḥ*) written on the dictionary. Hence the name of the author is given with variations such as Meḥmed ibn Aḥmed er-Rūmī, Ebū' l-Fazl Muḥammad ibn Aḥmed er-Rūmī and er-Rūmī Bosnevî Ebū' l-Fazl Muhammed Ahmed [11:91].

The dictionary was written in AH 1033/1624-1625 AD, according to the phrase טְלֹם of the hemistiche שׁלונט לופלים ושׁלונט לופלים שׁלונט שׁל שׁלונט שׁלונט שׁלונט שׁלונט שׁלונט שׁלונט שׁלונט שׁלונט שׁלונט שׁלונט שׁלונט שׁלונט שׁלונט שׁלונט שׁלונט שׁלונט שׁלונט שׁלונט ש

the prologue and written in *ebced* form (chronogram) [23:f.11b]³⁵. However, nothing is said about where the dictionary was written. It is suggested that it must have been written in Bosnia, according to the writer's birthplace and the research materials related to the dictionary.

There is no regularity for the number of beyts in a dictionary. It mainly consists of 455-465 bevts, of which only 420 bevts belongs to the dictionary part [10:6911:98]. In our copy, the number of total beyts are 458.

In the dictionary is given an explanation of about 2100 Arabic words with equivalents of 250 Persian and 1150 Ottoman Turkish words [9:22].

The author does not see the need for a quantitative calculation of the vocabulary (as stated in the preface of his work) in exchange for the complex work done, which is to cope with the translation of the words and the semantic interpretation [23:f.11b]³⁶. First, the Arabic word is given in the dictionary, then the Ottoman Turkish equivalent and semantic explanation of the word, and in some cases Persian as well. As the author also writes in the preface, "I bring the translation of the word next to every word [23:f.11b]³⁷ and then, I give both the *vezin* and *bahir* at the end of each kita [23:f.11b]³⁸.

More than 60 manuscripts and 32 printed copies of the dictionary are known in various libraries around the world [10:73]. It has already been published in Istanbul and Cairo [9:20].

لغ نشر شته اوغ لي) "On folios 29b-46a of the collection is "Lugat-i Ferişteoglū Vocabulary of Feristeoġlū) Arabic-Ottoman Turkish verse dictionary. It is a complete copy of the work and entitled "Hazā Luġat-i ibn Ferişte" (هذال غتاب في رشيته , translated as "This is Ibn Feriste's Dictionary") [23:f. 29b]³⁹.

The dictionary is written in 12 meters: Bahr-i Recez, Bahr-i Hezec, Bahr-i Muctess, Bahr-i Mūtekārib, Baḥr-i Remel, Baḥr-i Mūnseriḥ, Baḥr-i Hafīf, Baḥr-i Vāfīr, Baḥr-i Mūzārī, Baḥr-i Serī', Bahr-i Kāmil, Bahr-i Tavīl.

حمثالبتدر اول اللهك، ظلمي علمايلونيتدي رعاي تنظريل، كؤلي الهوزيتدي ف وم The beginning of the preface .

خبرات مقبل، او بمك ذرع الحمك قو غالم :The beginning of the vocabulary section خلق رسمق خرق رسمق اولو الشهدر ممام

The work's text panel is arranged in two columns, only 34b-44a folios are in one column, the number of lines varies from 8 to 15. Parts for the titles of the kitas have been left to be supplemented later, but mostly they have remained incomplete, sometimes with the wording "Ve minhu eyzā" (و مِن علي , translated as "This is from it"). There is no colophon that refers to date the text.

The author Ferişteoġlu 'Abdullaṭīf ibn Melek wrote his work as a *gift* to his grandson 'Abdürraḥmān for the benefit of his education.

The dictionary begins with prose preface, consists of 22 kttas with various meters (total 267 beyts)⁴⁰. It includes Ottoman Turkish equivalents of 1528 [5:10] Arabic words taken from the *Qur'ān*. If necessary, the dictionary includes semantic meanings of Arabic words explained in Ottoman Turkish rather than Persian equivalents. He assured that "the inclusion of Persian words will not benefit those who do not know the language" [23:f.29b]⁴¹.

The dictionary has been valued for being the first verse dictionary written in Ottoman Empire and having included the *Qur'ānic* vocabulary in the study-literature for the first time. Ferişteoġlu's verse dictionary is quite simple in artistic and poetic terms. It is mainly a simple list of Arabic-Ottoman Turkish word pairs, from non-literary, allegorical poetic lines, keeping the rhyme according to the choice of word-series.

There are 66 known manuscripts of the dictionary [18:72]. It has been printed 7 times from 1801 to 1900 [10:68].

On folios 47b-78b of the collection is the "Tuḥfe-i $Z\overline{\imath}b\overline{a}$ " ($\overline{\iota}$) The **Beautiful Gift**) trilingual Arabic-Persian-Ottoman Turkish verse dictionary $[23:f.47b]^{42}$.

This copy of the work is untitled. It is revealed at the end of the work, which is actually the author's colophon that the dictionary was written in AH 1234/1819 AD (chronogram). The title "Tuḥfe-i Zībā" and author's name, Ḥayret, are also given [23:f. 78b]⁴³.

The entire text of the dictionary is arranged in two columns, and the number of lines varies from 13 to 15. The sections for the title of dictionary and kutas are left blank. The latter added equivalent words in Ottoman Turkish are written next to some Persian and Arabic borrowed words in the prologue.

⁴⁰ The dictionary is written in 6 meters: Baḥr-i Remel; Baḥr-i Tavīl, Baḥr-i Recez, Baḥr-i Mūnseriḥ, Baḥr-i Hezec, Baḥr-i Mütekārib.

قىل شع كى دىمى دارانس ل

⁴³ Author's colophon: ىازدلمتمامن مان متاهى خمىن

ى الدىبوت نعا جرت زى

In the prologue the author touches upon the circumstances of writing a beautiful trilingual (Arabic, Persian, Ottoman Turkish) verse dictionary in the Ottoman tradition. He also speaks about the circumstances of the lexical vocabulary of the trilingual dictionary and its poetic style. The circumstances of utility in the writing of letters are also raised. According to the author, the dictionary is the result of his travels in Rūm (Ottoman Empire), Iran and Arabic countries. He considers it also as a service rendered to the ruler of Egypt during his stay in Egypt, Meḥmed 'Alī Paṣa, the dedication of the dictionary to his grandson Mīr 'Abbās, and the happiness bestowed on him. He points out that the words' equivalents are written one after the other, often with semantic explanations [23:47b-48b].

The reference studies of the dictionary also provide a general structural overview of the dictionary, according to which the work consists of a 35-beyt prologue, 74 kvtas and the epilogue consists of 13 beyts. The dictionary section alone consists of 821 beyts. There are 869 beyts in total. The dictionary includes 2900 words in total [14:152,17:135].

Our copy of the dictionary consists of the 35-beyt prologue, but only 71 kitas and the ending consists of 5 beyts. The dictionary section consists of 816 beyts, giving us 856 beyts in total.

Of course, there are obvious quantitative differences in composition between the Matenadaran's copy and the above-mentioned comparative study, but the numerical difference of the kutas may not prove the absence of this or that kuta, as extensive dictionary comparisons often show the presence of missing kutas as they could have been joined to the other one and it might seem that the kuta is missing.

As a regularity, the dictionary ends with a message to the generations, which we want to quote at the end of our article in the hope that future generations will perceive it: "Let the speech of the reader be polished, which is the desire of the writer's heart" [23:f.78b]⁴⁴.

Conclusion

In fact, the primary purpose of verse dictionaries was to introduce students to foreign languages - Persian, Arabic, as well as Ottoman Turkish (*elsine-i ṣelāṣe*), to facilitate language learning, develop and spread literary speech and practice in prosody (especially in $Ar\bar{u}\dot{z}$ meter).

In particular, the dictionaries were used as textbooks in pre-schools, known as *şıbyān mektebī*, *mekātib-i ibtidā'i*, *ilk mektep*, and later also in *medrese*s until the middle of the 19th century in Turkish and Turkish-speaking society.

The dictionaries were composed not only of simple word combinations, but there were also works created in two or three languages (like a *mülemma* 'poem) which developed artistic thought and provide interesting works for reading. They

_

اوقولهٔ فصوی ح لوسوانسانی ⁴⁴ یاز مزادی و اور ادی

enriched the languages with vocabulary and linguistic-structural means of expressions. In this case, the rich linguistic culture of the Persian and as well as the Arabic languages with the religious and fictional lexicon flowed into the Turkish language, automatically helping to form Ottoman Turkish as the official literary language of the Ottoman Empire.

Most of the verse dictionaries became important sources of imitation for each other and were included in the learning process like their predecessors. Even for teachers they were to become small methodological manuals, as they provided an explanation of the grammatical structures of the primary and transferable languages.

Thus "Collections of Verse Dictionaries" were compiled as language-textbooks, with the purpose of facilitating language learning (Arabic, Persian, Ottoman Turkish) with the simultaneous use of several verse dictionaries and to be involved in the process of learning languages through memorizing (learning by heart).

In fact, considering the colophons, the years of compositions, we should mention that our collection MS No 1467 was compiled in the 19th or mid 19th century as a textbook. It was the time when such dictionaries were still used as textbooks in the Turkish educational system and were included in the language teaching or studying (in this case especially in Arabic) process.

It is not a coincidence either that the collection includes Imam al-Būṣīrī's famous "Ķaṣīde-i Būrde" ode dedicated to the Prophet Muḥammed and as well as Imam Sirajuddin Ali al-Ushi's "Amālī Ṣerīf" (that is commonly known as "Bad" al-Amālī") didactic ode explaining the Islamic creed in Arabic. They were included in the religious elementary education curriculum as separate works in the original language.

So, even the comprehensive presentation of this collection can be considered sufficient for it to take its place in the manuscripts of four similar collections we have mentioned, which are known as the "Collection of Verse Dictionaries" in foreign collections. It may have all the preconditions to become a source of new studies for local and foreign researchers.

ՄԱՏԵՆԱԴԱՐԱՆԻ ԱՐԱԲԱՏԱՌ ՁԵՌԱԳՐԵՐԻ ՀԱՎԱՔԱԾՈՒԻ Հ^{ւր} 1467 ՁԵՌԱԳԻՐԸ ՈՐՊԵՍ «ՉԱՓԱԾՈ ԲԱՌԱՐԱՆՆԵՐԻ ԺՈՂՈՎԱԾՈՒԻ» ՆՈՐԱՀԱՅՏ ՕՐԻՆԱԿ

Անի Ավետիսյան

Բանալի բառեր՝ Արաբատառ ձեռագրերի հավաքածու, օսմաներեն ձեռագրեր, բառարան, չափածո բառարան, չափածո բառարանների ժողովածու, Թուհֆե, Լյուղաթ-ի Ֆերիշթեօղլու, Սուբհա-ի Սրբյան, Թուհֆե-ի Ջիբա։

Հոդվածագիրն առաջին անգամ հոդվածի շրջանակում ներկայացնում է Մատենադարանի Արաբատառ ձեռագրերի հավաքածուի մաս կազմող օսմաներեն ձեռագրերի շարքում թուրք ձեռագրագիտության մեջ որպես «Չափածո բառարանների ժողովածու» անունով հայտնի <մր 1467 եզակի ձեռագիր-օրինակը։</p>

Նախքան ժողովածուի մատենադարանյան օրինակը ներկայացնելը, հեղինակը հոդվածի առաջին մասում հակիրճ անդրադառնում է ընդհանրապես ժողովածուների կազմման հանգամանքներին, նրանց նշանակությանը և տեսակներին, որոնց մեջ առանձնանում են նաև «Չափածո բառարանների ժողովածու» անունով հայտնի ժողովածուները։

Նշվում էծ, որ նման ժողովածուների կազմման միջավայր են մատնանշվում թեքքե կամ դերգահ, մեդրեսե կոչվող կրոնա-ուսումնական հաստատությունները։ Դրանք կազմվել են լեզուների դասավանդման դասագրքերի նշանակությամբ։ Այս կերպ ապահովվել է լեզուների (արաբերեն, պարսկերեն, օսմաներեն) դյուրին ուսուցումը մի քանի չափածո բառարանների միաժամանակյա գործածությամբ՝ դարձել են անգիրի միջոցով լեզուների ուսուցումն ապահովող կարևոր դասագրքային նշանակության աղբյուրներ։

«Չափածո բառարանների ժողովածու»ի մատենադարանյան եզակի օրինակում ընդգրկված են 14-15-րդ, 17-րդ և 19-րդ դարերի գրող-բանաստեղծ-թարգմանիչ- բառարանագիրների գրչին պատկանող թվով 3՝ Ֆերիշթեօղլու Աբդ էլ Լաթիֆ իբն Մելեքի «Լյուղաթ-ի Ֆերիշթեօղլու» և Բոսնալը էբուլ-Ֆազլ

Մուհամմեդ (Մեհմեդ) իբն Ահմեդ էր-Ռումիի «Սուբհա-ի Սըբյան» արաբերեն-օս-մաներեն, նաև Ադանալը Հոջա Մեհմեդ Հայրեթի (բուն անունը՝ Մեհմեդ Բեհաեդդին Հայրեթ) «Թուհֆե-ի Ջիբա» (հայտնի նաև «Թուհֆե-ի Հայրեթ» կամ «Թուհֆե-ի Դուրրի» կամ «Թուհֆե-ի Սե Ջեբան» անուններով) արաբերեն-պարսկերեն-օսմաներեն չափածո բառարանների ամբողջական օրինակները։

Հոդվածագիրը չի բավարարվել միայն ժողովածուի համապարփակ ներկայացմամբ, այլ անդրադարձել է ընդհանրապես թուրք դասական գրականության, բառարանագրության մեջ ավանդույթ դարձած չափածո բառարաններ գրելու մեթոդաբանությանը, նրանց կառուցվածքային առանձնահատկություններին, թուրք հասարակությունում, կրոնական, գրական և կրթական բնագավառներում ունեցած նրանց նշանակությանն ու դերակատարմանը։ Շեշտելով, որ չափածո բառարանների գրման նպատակները բոլոր դեպքերում եղել են՝ լեզուների ուսուցումը, գրական խոսքի տարածումն ու զարգացումը, տաղաչափական (մասնավորապես՝ *առուզի*ն) և չափածո խոսքարվեստին վարժեցնելը։

Ի վերջո ժողովածուի այս համեստ ներկայացումն անգամ բավարար է, որ այն նույնպես կազմի օտար հավաքածուներում «Չափածո բառարանների ժողովածու» անունով արդեն հայտնի չորս նույնանուն ժողովածուների ձեռագրաշարքերի մի մասը, դառնա տեղի և օտար մասնագետների համար նոր ուսումնասիրությունների աղբյուր։
