

## ИЗВЕСТИЯ НАН АРМЕНИИ: МАТЕМАТИКА

том 58, номер 1, 2023

## СОДЕРЖАНИЕ

|                                                                                                                                                                           |         |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------|
| С. А. АЛЕКСАНЯН, Наилучшие равномерные приближения в углах<br>целыми функциями .....                                                                                      | 3       |
| Н. НАКОPIAN, G. VARDANYAN, N. VARDANYAN, On the Gasca-Maeztu<br>conjecture for $n = 6$ .....                                                                              | 22      |
| Л. НАКОВЬАН, К. КЕРЬАН, Periodic orthonormal spline systems with<br>arbitrary knots as bases in $H^1()$ .....                                                             | 47      |
| Р. МАНДАЛ, Р. БИШВАС, Uniqueness of meromorphic functions when<br>its shift and first derivative share three values .....                                                 | 59      |
| А. РОЙ, А. БАНИЕРЖЕЕ, Uniqueness of a meromorphic function partially<br>and normally sharing small functions with its different variants of<br>generalized operator ..... | 71      |
| Т. ЛУКАШ ЖЫНДА, Corrigendum to 'On weights which admit<br>reproducing kernel of Szegő type' .....                                                                         | 89 – 90 |

## IZVESTIYA NAN ARMENII: MATEMATIKA

Vol. 58, No. 1, 2023

## CONTENTS

|                                                                                                                                                                          |         |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------|
| S. A. ALEKSANYAN, Best uniform approximation on angles by entire<br>functions .....                                                                                      | 3       |
| H. NAKOPIAN, G. VARDANYAN, N. VARDANYAN, On the Gasca-Maeztu<br>conjecture for $n = 6$ .....                                                                             | 22      |
| L. NAKOVYAN, K. KERYAN, Periodic orthonormal spline systems with<br>arbitrary knots as bases in $H^1()$ .....                                                            | 47      |
| R. MANDAL, R. BISWAS, Uniqueness of meromorphic functions when<br>its shift and first derivative share three values .....                                                | 59      |
| A. ROY, A. BANERJEE, Uniqueness of a meromorphic function partially<br>and normally sharing small functions with its different variants of<br>generalized operator ..... | 71      |
| T. ŁUKASZ ŻYNDĄ, Corrigendum to 'On weights which admit<br>reproducing kernel of Szegő type' .....                                                                       | 89 – 90 |
