

Հ. Մ. ՌԶՏՐԻՆԻ

成子春 著 卷一 五

6748703

同治元年 今實 一海內通商

李公朴遺囑

1. The first part of the paper is devoted to the study of the properties of the function $f(x)$ defined by the equation

1. The first part of the paper is devoted to a general discussion of the problem of the existence of solutions of the system of equations (1) for arbitrary values of the parameters α and β . It is shown that the system has solutions for arbitrary values of the parameters α and β if and only if the condition $\alpha + \beta = 1$ is satisfied.

1. The first part of the paper is devoted to a general discussion of the problem of the existence of solutions of the system of equations (1) for arbitrary values of the parameters α and β . It is shown that the system has solutions for all values of the parameters α and β if and only if the condition $\alpha + \beta \geq 1$ is satisfied.

$\varphi = \frac{1}{2} \pi$ 25. $\sin \frac{1}{2} \pi = 1$, $\cos \frac{1}{2} \pi = 0$
 $\sin \frac{3}{2} \pi = -1$, $\cos \frac{3}{2} \pi = 0$
 $\sin \frac{5}{2} \pi = 1$, $\cos \frac{5}{2} \pi = 0$
 $\sin \frac{7}{2} \pi = -1$, $\cos \frac{7}{2} \pi = 0$
 $\sin \frac{9}{2} \pi = 1$, $\cos \frac{9}{2} \pi = 0$
 $\sin \frac{11}{2} \pi = -1$, $\cos \frac{11}{2} \pi = 0$
 $\sin \frac{13}{2} \pi = 1$, $\cos \frac{13}{2} \pi = 0$
 $\sin \frac{15}{2} \pi = -1$, $\cos \frac{15}{2} \pi = 0$

1. The first part of the paper is devoted to a general discussion of the problem of the existence of solutions of the system of equations (1) for arbitrary values of the parameters α and β . It is shown that the system has solutions for arbitrary values of the parameters α and β if and only if the condition $\alpha + \beta = 1$ is satisfied.

1. The first part of the paper is devoted to a review of the literature on the topic. It starts with a general introduction to the field, followed by a detailed discussion of the various methods used in the study. The authors then present their own findings, which are compared with those of previous studies. Finally, they conclude with some suggestions for future research.

2. The first of these is the fact that the
 world is not a uniform whole, but is
 composed of many different parts, each
 of which has its own characteristics and
 its own laws. This is the principle of
 diversity, and it is the basis of all
 knowledge.
