

# CONTENTS

## Number 1

The optical and infrared observations of SU Tau <i>V. T. Doroshenko, Yu. S. Efimov, A. E. Rosenbush, V. Yu. Terebizh, V. I. Shenavrin</i>	5
The variability of the integral light and the H <sub>2</sub> -emission of the star T Tauri <i>G. V. Zaytseva</i>	17
Observations of the planetary nebulae NGC 7027 and NGC 7293 at the Kottamia observatory . . . . . <i>A. S. Asaad, S. M. Hassan, G. S. Khromov</i>	31
On the dynamics of close binaries and single stars in open stellar clusters <i>V. M. Danilov</i>	37
The catalogue of Trapezium type multiple systems . . . . . <i>G. N. Salukvadze</i>	57
The UV galaxies with double and multiple nuclei. II. <i>A. R. Petrosian, K. A. Sahakian, E. Ye. Khachikian</i>	69
Spectra of some variable radio sources according to observations by mean of RATAN-600 radiotelescope <i>M. G. Mingaliev, S. A. Pustil'nik, S. A. Trushkin, R. M. Ktrakosian, V. H. Malumtjan</i>	91
On the behaviour of radial velocity dispersion at outer regions of spherical systems of gravitating bodies . . . . . <i>L. P. Ossipkov</i>	99
Transfer of resonance radiation in infinite isotropically expanding medium <i>S. I. Grachov</i>	111
On the theory of superfluid liquid rotation in pulsars taking into account the relativistic effects in vortexes . . . . . <i>V. A. Chernobay, V. V. Andronic</i>	123
The gravitational stability of the rotating interput disks <i>M. G. Abrahamian, R. S. Oganessian</i>	129
The kinetics of hydrogen recombination with low mass primordial black holes <i>P. D. Nasel'skiy</i>	145
On carbon burning products at constant temperature <i>O. A. Bessonov, A. D. Kudryashov, E. V. Ergma</i>	161
On the Green's function of a non-coherent, anisotropically scattering plane-parallel slab . . . . . <i>H. V. Pigidjian</i>	169

## NOTES

The spectrum of V 380 Ori in near infrared . . . . . <i>G. I. Shantin, V. S. Shevchenko</i>	191
--	-----

- On the distribution of compact galaxies in compact groups  
*R. A. Vardanian, Yu. K. Melik-Alaverdian* 195

## Number 2

- The transfer of resonance radiation in the moving media with large-scale radiative coupling . . . . . *V. P. Grinin* 201
- The angular momentum loss from the star that is the component of a close binary system and has a rapid rotating core . . . *V. G. Gorbatsky* 215
- On one general expression for the potential of spherical stellar systems  
*L. P. Ossipkov* 225
- On the extension of the pulsating star atmosphere under the action of periodical shock waves . . . . . *O. V. Fedorova* 239
- On the question about the sources of energy in the red giants with neutron kernel . . . . . *N. K. Ovakimova* 257
- Spectrophotometry and morphology of the galaxies with UV excess. II. Haro 15  
*A. A. Yegiazarian, M. A. Kazarian, E. Ye. Khachikyan* 263
- Photographic photometry of compact cluster of compact galaxies No. 1  
*R. K. Shahbasian* 273
- Compact groups of compact galaxies. VIII . . . *F. W. Baier, H. Tiersch* 279
- Observations of radio flares of stars in the region of the Pleiades at 327 MHz  
*V. A. Sanamyan, V. R. Venugopal, H. S. Chavushian* 283
- The surface brightness of the northern Milky way in the red region  
*Yu. M. Zavarzin* 293
- Microstructures in the planetary nebula NGC 7393  
*S. V. Vladimirov, G. S. Khromov* 307
- The zodiacal light and the apparent magnitudes of galaxies . *B. I. Fessenko* 315
- The kinetics of neutrinos radiation in the hot universe with primordial "black holes" . . . . . *B. V. Vatner* 325
- Static and near to static semiclosed configurations and cosmological term  
*G. E. Gorelik* 339
- The distribution of O—B stars . . . . . *Yu. K. Melik-Alaverdian* 345
- The luminosity function and the spatial density of pulsars  
*O. H. Guseinov, F. K. Kasumov, I. M. Yusifov* 351

## NOTES

- The loss of energy of cosmic rays in the expanding areas of Galaxy  
*V. G. Krivdik* 357

## REVIEWS

- V. G. Gorbatski. "Cosmic gasodynamics" . . . . . *I. A. Klimishin* 361

## Number 3

The derivation of the frequency-function of stellar flares in a stellar aggregate	<i>V. A. Ambartsumian</i>	367
The effect of electron scattering on continuous spectrum of a star	<i>V. V. Sobolev</i>	383
The diffuse reflection of light for arbitrary phase function	<i>A. G. Nikoghossian, H. A. Harutyunian</i>	393
About an approximate calculation of aid functions in radiation transport theory	<i>V. V. Gorelov, V. I. Ilyin</i>	407
P Cygni in far ultraviolet	<i>V. A. Ambartsumian, L. V. Mirzoyan, T. P. Snow</i>	425
Origin of magnetic fields and superdense cosmogony	<i>R. M. Muradian</i>	439
The radio spectrum of OQ 208-Markarian 668	<i>Gabriel Kojoian, D. F. Dickinson, H. M. Tovmassian, Ann St. Clair Dinger</i>	447
On the morphology of compact groups of compact galaxies	<i>R. K. Shahbazian, A. S. Amirkhanian</i>	455
On the ellipticities of galaxies in clusters A 193 and A 2255	<i>A. T. Kalloghlian</i>	467
The regularization method by constructing the mass distribution models of galaxies	<i>S. A. Kutuzov, V. O. Sergeev</i>	473
The configuration of degenerated masses according to bimetric theory of gravitation	<i>G. S. Sahakian, A. V. Sarkisian, B. V. Khachatryan, E. V. Choubarian</i>	489
Self-similar movements of gas in stars	<i>O. I. Bogoyavlensky</i>	501
On formation of elements	<i>Yu. K. Melik-Alaverdian</i>	515
NOTES		
Colorimetry of the cometary nebulae Parsamian 21	<i>E. S. Parsamian, V. M. Petrosian</i>	521
On some changes in the spectrum of R Mon	<i>T. Yu. Magakian</i>	524
On the transfer problems in an infinite medium	<i>M. S. Gevorgian</i>	527
On investigation of homogeneity of galaxy distribution from the morphological catalogue of galaxies	<i>N. G. Kogoshvili</i>	530
On the problem of appearance of superconducting vortex system in the pulsar's nucleus	<i>V. A. Chernobay, O. P. Bessub</i>	533
